How to use the LUPC Zoning and Parcel Viewer

June 8, 2018

The tools and their description are listed below. You can expand or collapse all the tool windows by clicking on the chevron icon or close the tool by clicking on the X.

1. Legend:

a. The legend displays all the symbology for each GIS layer. can be fully displayed or scrolled up by clicking on the chevron icon

Basemap Gal

Dark Gray Canvas

- 2. Layer list:
 - a. The GIS layer list is where you can turn the layers on or off.
 - b. The _____ icon allows the user to manipulate the layer display

♥■× Iar Turn all layers on Turn all layers off	E S E S C
	E S Basemap Gallery & X

Basemap Gallery list:

c. The Basemap Gallery allows the user to choose a background image of their choice

agery v Labels

- 3. Measurement tool:
 - Choose the type of measurement (i.e. point, line, area), then choose the unit of measure (i.e. Acres, feet) from the dropdown list.
 - a. **Area:** start creating the area by left clicking the mouse and continue to left click until you are done creating your area then double click to complete the area measurement. To clear the measured area, left click on the map away from the polygon or choose another measure tool.
 - b. Line: start the line by left clicking on the mouse and end the line by double clicking. To clear the measured line left click on the map away from the line or choose another measure tool.

c. **Point:** Place a point by left clicking on the mouse. To clear the point, choose another measure tool. Without placing a point your mouse cursor will dynamically display the map coordinates in either Degrees or Degrees, Minutes, Seconds.

DPI:

150

- 4. Print tool:
 - Map title The user can enter any title they want
 - Layout choose the paper size from the dropdown list
 - c. Format choose the file type from the dropdown list
 - d. Advanced
- Print Advanced This is a map of Albany Twp.
