

## **13.0 URBAN IMPAIRED STREAM SUBMISSIONS**

### **13.1 Introduction**

The Urban Impaired Streams Watersheds GIS data, updated February 6, 2016, provided by MDEP's Bureau of Land Resources, was reviewed in relation to the NECEC Project locations. This review indicated that no components of the Project will be constructed in or near an Urban Impaired Stream and/or Watershed. Additionally, a review of the MDEP Chapter 502- Direct Watersheds of Lakes Most at Risk from New Development and Urban Impaired Streams List, confirmed these findings.
