**Subject:** No CMP Power corridor

This power line project will ruin the economy of the towns along its route. We survive on tourism and if this gets installed it will kill the ecosystem and the natural beauty of our beloved countryside and woods. Our scenic vistas, native brook trout, ATV and snowmobile trails, deer, bear and moose, all things that bring tourists from in and out of state to enjoy are now in grave danger of being lost. If Massachusetts is so desperate for power that they can't generate some in their own state instead of raping ours.

So NO, do not allow this beastly thing to be installed, do not let the citizens of these communities be slapped in the face and trampled on by big corporations from out of the country.
