Thank you for giving the public the opportunity to express their thoughts on NECEC.

I have a small, off grid cabin in the Enchanted area and have been to or seen most of the areas that this line would affect.

There is no way to compensate me for the beauty that I see, sense of peace that I feel and love that I have for these places.

They are not, as a CMP representative described to me, useless, little used wastelands.

It really is difficult and heartbreaking for me to imagine what those 53 miles would be like if this project happens.

Most of us that speak out against it truly love Maine because of its forests, waters, wildlife and scenery.

From the minute the construction equipment and workers turn onto the Spencer Road, all that we love would be changed forever. I haven't heard much about the initial impact... I have been on that road when one logging truck went by and created so much dust it was several minutes before I could see the road again.

I have seen the oil and gasoline spills staining the streams and forest floor after small logging projects. A project this large would pollute the earth so much more.

We can't forget the impact the chemicals used to destroy and control vegetation would have from the beginning.. forever.

I have read that a project like this would guarantee the movement of invasive plants and other organisms through those areas.

CMP, AVANGRID, IBERDROLA do not care about Maine, reduction in greenhouse gases or the environment. We that oppose NECEC do.

This project, as stated by many experts in their individual fields, is not a solution to Massachusetts' needs. Please do not support it!
