I am writing you today because I can not attend the meeting scheduled in Farmington this evening. I have several concerns about this project. My property abuts the cmp corridor. There is conflicting deeds that my indicate that my property end in the middle of their present transmission lines. This is yet to be resolved.

CMP talks about how it will reduce the carbon footprint. I question this. They will be clear cutting about 54 miles long or there abuts and 150 ft of trees. Trees help to reduce the carbon footprint so how is cmp saying that their project will reduce the carbon footprint when they plan to cut millions of trees?

This area is also a winter deer yard. In the winter it is not uncommon to see up to 100 deer in a relatively short area. In the spring they all return to their own areas. This project may harm important wildlife areas.

To make it short I also have a natural wet hole it never dries up and is in the project area. This could be the source of the well water. I have yet to have my well dry up. It is an artesian aquifer. If this is disturbed or disrupted what recourse do I have?

This project has many issues and I feel that it is bad for Maine it will not benefit Maine except to make CMP, Quebec Hydro and Massachusetts Money.

Thank You
