You may be right. From CMP's table (Exh. 7-7), it looks like it's all Segment 5 with no clearing. Thanks,

Bob Stratton

Bob,
That section of the line, if my memory is correct, is almost exclusively a rebuild or the addition of line inside the existing cleared corridor. I will double check though

Subject: Region B brook trout streams

Jim,

Region B Fisheries notes that many of the streams to be crossed by the NECEC powerline within their region are in the Sheepscot River watershed. "This area is rich with wild trout resources and should receive as much protection as possible." The streams in the Whitefield/Windsor area are especially significant.

I will provide more information for Region E as it becomes available. Thank you,

Bob Stratton
