

VP-1: Panoramic view looking west to north toward the proposed RoxWind Project from Viewpoint 1 on the Swift River in Mexico. All four proposed RoxWind turbines will be visible at distances of 2.2 to 2.4 miles from this viewpoint. Ten turbines from the existing Record Hill Wind Project will be visible to the northwest at distances of 3.1 to 4.4 miles. A photosimulation has been completed for this location.

Lat/Long: 44.609337°, -70.574063° → This viewpoint is approximately 280 feet south of requested point (44.609722°, -70.575000°) and provided the most potential for visibility from this area with the North Twin Mountain ridgeline visible.

VP-2: Panoramic view looking west to north toward the proposed RoxWind Project from Viewpoint 2 on the Swift River in Mexico. All four proposed RoxWind turbines will be visible at distances of 2.2 to 2.4 miles from this viewpoint. 17 turbines from the existing Record Hill Wind Project will be visible to the northwest at distances of 3.0 to 5.5 miles.

Lat/Long: 44.609635°, -70.574992° → This viewpoint is approximately 20 feet southwest of requested point (44.609722°, -70.575000°). The North Twin Mountain ridgeline is screened by vegetation.

VP-3: Panoramic view looking west to north from Viewpoint 3 toward the proposed RoxWind Project from the Swift River in Roxbury. The Project will not be visible due to intervening vegetation.

Lat/Long: 44.687022°, -70.604793°

VP-4: Panoramic view looking southeast to southwest from Viewpoint 4 toward the proposed RoxWind Project from the Swift River in Roxbury. The Project will not be visible due to intervening vegetation.

Lat/Long: 44.690353°, -70.606242°

VP-5: Panoramic view looking southeast to southwest from Viewpoint 5 toward the proposed RoxWind Project from the Swift River in Roxbury. The Project will not be visible due to intervening vegetation during leaf-on season.

Lat/Long: 44.692452°, -70.605915° → This viewpoint is approximately 85 feet north of requested point (44.692222°, -70.605833°) and provided most potential for visibility from this area.

VP-6: Panoramic view looking southeast to southwest from Viewpoint 6 toward the proposed RoxWind Project from the West Branch Ellis River in Andover. The Project will not be visible due to intervening vegetation.

Lat/Long: 44.692452°, -70.605915° → This viewpoint is approximately 35 feet northeast of requested point (44.639722°, -70.747222°).
