Overview of the Maine BRFSS Data Dictionary

Introduction

The Maine BRFSS Data Dictionary was created to help users better understand and accurately produce estimates from the Maine BRFSS multi-year database. For Maine CDC users this database is available on the Maine CDC internal "M" drive or from the Maine BRFSS Coordinator.

A PDF version of the Data Dictionary is available on the M drive and at: http://www.maine.gov/dhhs/mecdc/public-health-systems/data-research/brfss. The PDF file allows users to search for individual words and to browse topics via the Table of Contents.

Data Collection and Cleaning Process

The BRFSS surveys target non-institutional adults aged 18 and over and are fielded almost daily throughout the year. From BRFSS surveys conducted by each state (or its contractors), data are submitted monthly to national CDC where the monthly data are collated and cleaned. In the summer of each year, national CDC sends a cumulative annual data file back to each state with BRFSS data from the previous calendar year. National CDC provides some helpful reports and documentation along with the annual data file; however, no documentation is made available for state added questions. The state added question responses are combined into one variable labeled STATEQUE in the file provided by the national CDC. Each state must separate out and clean state-added variables independently.

Maine takes the annual data file from the national CDC, separates and cleans the state-added variables for that year, and then merges the one-year file with the existing multi-year database that includes BRFSS data extending back to 2001. The Maine BRFSS database is updated, cleaned and re-released each spring of the following year. This

Data Dictionary is then updated to reflect any changes in the survey questionnaires and multi-year database.

Note that in the process of cleaning and standardizing the annual data from the national CDC for the multi-year database, some variable names are changed to match similar questions from different years and facilitate trend analysis.

Quick Tips for Data Dictionary Users

- The Data Year and Part column lists the survey year (and part of the survey, if applicable) where data exist for each variable. If a year is not listed, it indicates the variable has no data for that year (i.e. the question was not asked)
- The most recent year (2021) is shaded in the Data Year and Part column throughout.
- Variables are organized by topic (e.g. Asthma) and by type. Within each topic area, variables from Core questions appear first, followed by Module questions, State Added questions, and Calculated Variables.
- Description, code value and user information is left blank when the information cannot be found in original documentation provided by the national CDC.
- New variables created by combining two or more variables are identified by _C at the end of the name of the combined variables.
- State added questions variable names are in the format xxx_xxxx i.e. three characters__four characters. Examples include: SMK_QUIT and DNT_ADVC.

<u>Survey Instrument for 2021</u>

A PDF version of the 2021 Maine BRFSS Survey Instrument (Questionnaire) is available at the Maine BRFSS Website http://www.maine.gov/dhhs/mecdc/public-health-systems/data-research/brfss/questionnaires.shtml.

<u>Brief History of the Maine BRFSS Survey, Database and Data Dictionary</u>

The BRFSS survey started in Maine in 1987. For unknown reasons, these early data are not included in the multi-year database or in this Data Dictionary. In 2000, the multi-year database and Data Dictionary were first created. That year, Maine BRFSS conducted both an in-house 2,000 sample survey and an additional contractor oversample of 2,500 surveys of ten counties by Macro International Inc. The purpose of the oversample was to obtain enough data for county level analysis. It was discovered that the survey questionnaire for state-added questions used by in-house interviewers in 2000 was not exactly the same as the one used by the contractor for the oversample. As a result, data for 2000 were dropped from the multi-year database which now includes data extending back to 2001.

To provide adequate sample sizes for smaller geographically defined populations of interest, Maine samples disproportionately from strata that correspond to sub-state regions for both landline and cellphone samples.

In 2007, Maine BRFSS began a partnership with Maine's Tobacco Free Program for a split-sample survey. In this split survey the "Core" (the required national survey) is the same for each survey but the optional part of the surveys are different, and are called Part A and Part B.

This change allowed for additional questions to be included in the survey and helped the Tobacco Program get data that was formerly collected as part of the Adult Tobacco Survey. National CDC supplies the state with weighting variables needed to estimate prevalence using questions from Part A, from Part B, and questions that are included in both parts. For years 2012-2021, landline and cell phone respondents were both part of the split sample. (See the next section for information on how to use the split sample for analysis.)

Also implemented in 2007, Maine began issuing advance letters to individuals selected as part of the "list assisted" sample. (This process was piloted in 2004). Approximately 30% of those in Maine's BRFSS sample receive an advance letter, and 45% of participating respondents recall receiving an advanced letter.

Maine Behavioral Risk Factor Surveillance System
Data Dictionary 1994 - 2021

In 2008, national CDC started including household and child weighting variables in their annual distribution to the states. While the BRFSS is a non-institutional adult survey, in a few instances household and child health data are available in the database. In such cases, the appropriate household or child weights should be used. (More information on the child and household weighting variables are available in the Key Variables table below).

Maine BRFSS implemented several measures in 2009 designed to maintain or improve response rates. First, a Maine-based caller identification ("MaineCDC BRFSS") was assigned. Second, the protocol for contacting prospective respondents was altered. After the first call with no response, interviewers would leave a message identifying themselves as BRFSS interviewers and saying they would call back. Maine BRFSS follows the national guidelines for the number of calls to each number and how refusals are handled.

Maine BRFSS Split Sample Landline and Cell Phone Sizes by Year

Year	Total	Part A	Part A Landline	Part A Cell	Part B	Part B Landline	Part B Cell	Part C	Core	Cell
2004	3,530	*	*	*	*	*	*	*	*	*
2005	3,960	*	*	*	*	*	*	*	*	*
2006	4,040	*	*	*	*	*	*	*	*	*
2007	6,830	4,182	*	*	2,648	*	*	*	*	*
2008	6,788	4,091	*	*	2,697	*	*	*	*	*
2009	8,082	4,038	*	*	4,044	*	*	*	*	*
2010	8,132	4,060	*	*	4,072	*	*	*	*	*
2011	13,243	3,998	*	*	4,011	*	*	4,061	*	1,173
2012	9,876	*	4,014	900	*	4,026	936	*	*	*

* Not applicable for the survey year

Maine Behavioral Risk Factor Surveillance System
Data Dictionary 1994 - 2021

Methodological Changes to the BRFSS

Two important methodological changes to the BRFSS surveys were implemented beginning in 2011 and continued through 2014: 1) A cell phone sample was added to the sampling and data collection process; and 2) raking procedures were used to weight the data. Starting in 2015, the landline and cellphone sample were combined.

In 2011, about 10% of total completes were conducted via a cell phone interview. The national CDC increased the proportion of cell phone completes to approximately 20% in 2012. The cell phone sample was treated as a sixth stratum and was not defined by geography. Individuals in the 2011 - 2012 cell phone samples can live in any county in Maine (unlike those in the five other strata that are defined by county). Beginning 2013, cellular telephone stratification is conducted by the BRFSS, although geographic specificity is less reliable for cellular telephone numbers than for landline numbers.

The CDC implemented the cell phone sample and raking weighting procedures to "keep the data accurate and representative of the total population." The CDC points out that an estimated 3 in 10 U.S. households have only cell phones, and that people living in cell-only households are younger on average, rent instead of owning their homes, and tend to be unmarried – all characteristics that are also linked with behaviors such as drinking and smoking. The new raking weighting procedure is an improvement over the former method (called "post-stratification") because it allows for more precise adjustments to the weighting process, including adjustments for a larger number of demographic variables such as education level, marital status, and home ownership. This reduces the potential for bias and increases the representativeness of BRFSS estimates.

The CDC published an MMWR report and several additional documents describing the 2011 changes to the BRFSS methodology and the implications for surveillance. These documents are available at: http://www.cdc.gov/surveillancepractice/reports/brfss/brfss.html

Maine BRFSS Suppression Guidelines

Maine BRFSS recommends use of the following three suppression guidelines for any Maine BRFSS data analysis that is to be publicly released. The purpose of these guidelines is to avoid the release of estimates that are not statistically reliable.

1. Numerator less than 5
2. Denominator less than 50
3. Confidence Interval more than 20 points wide.

If any of these guidelines are not met for a given cell, the results for that cell should be suppressed (i.e. not reported). In addition, if a category has one or more cells suppressed, the total for that category should also be suppressed. This prevents someone from determining the value of a suppressed cell by subtracting the value of a non-suppressed cell from the category total.

Maine BRFSS recognizes there are occasions when variations from these suppression guidelines are deemed appropriate and makes no attempt to control how knowledgeable users of BRFSS data disseminate their results.

Maine BRFSS follows the general guidelines of the national CDC, as well as the guidelines of the Maine CDC Privacy Policy and its revisions.

Key Variables
The Data Dictionary includes information about hundreds of variables that are included in the multi-year database. The following are variables created by Maine BRFSS in the past several years to facilitate analysis.

Variable Name	Description
DISTRICT	Used to get prevalence estimates across Maine's Health Districts
COUNTY	Used for county-level analysis
YEARPSU	Before 2000 the _PSU (Primary Sampling Unit) variable should be used. Beginning with 2000 or after that date either the _PSU or the YEARPSU variable may be used.
PART	Verifies the part or arm for a given question and its corresponding weight. Applies to split sample years, 2007 –present.
Child weights	Used to construct prevalence estimates based on a randomly selected child under age 18 from each household. Available beginning in 2006. Use _CHILDWT for non-split sample years or when children are included in both Parts A and B, _CHILDQ1 for children in Part A only, and _CHILDQ2 for Part B only. For 2011, use _CLDWTV3. In 2012, use _CLCWTV2 for landline and cell phone questions and _CLDWTV2 for landline only questions. In 2014, use _CLDWTV1 for landline Part A questions and _CLCWTV1 for landline and cell questions in Part A. For 2015-2017, use _CLCWTV1. Starting in 2018 use _CLLCPWT. (The Random Child Selection module appeared in Part A of the 2015 instrument and Part A and B starting in 2017.)
Household weights	Household weight variables used to create household-level estimates. In 2007, national CDC began providing a household weight variable for the Core survey (_HOUSEWT). Maine-created household weight variables are currently available for Part A (_HOUSEWT1) and Part B (_HOUSEWT2) for the years 2007 through 2014 in the multi-year database. Beginning in 2015, house weights were renamed due to methodological differences in their calculation. _LLCPHHWT, _LLCPHHWT1, _LLCPHHWT2 for Core, Part A and Part B, respectively. Starting in 2020, Maine's household weight was not produced. **Use of part A and part B household weights may result in imprecise estimates for some questions. The CDC has advised that the household weight should not be used when the sample includes cellular telephone respondents, which are not included in the household weights.**

Glossary

The following table describes terms used throughout the Data Dictionary.

Term	Definition
Core	Core questions are mandatory survey questions established by the national CDC and comprise approximately the first 90 questions of each year's survey.
Section	Sections are groups of related mandatory (i.e. Core) questions.
Module	Modules are a group of related optional (non-Core) questions developed and made available by the national CDC that can be selected for use by the state. Modules are available for topics such as diabetes, asthma, mental illness, etc.
State added	State added questions are questions selected by the state that are not normally part of any BRFSS Module.
Calculated Variable	A variable calculated by the national CDC or state based on responses to two or more original variables. For example, body mass

	index (_BMI) is calculated based on height and weight given by the respondent.
Skip Pattern	The organization of the survey questionnaire so that questions are asked only of individuals who fit certain criteria.

Working with Maine BRFSS Split Sample Years

Beginning in 2007, the Maine BRFSS partnered with Maine's Partnership for a Tobacco Free Maine Program for a BRFSS split survey. In 2011, the national CDC added a cell phone sample to the BRFSS and used a new method for weighting the data called raking. Accurate analysis of the split sample data requires that the correct weight variable be used.

Selecting the Correct Weight Variable

The selection of the BRFSS weight variable depends on the survey year, whether the question was collected in a landline or cell phone sample (applies beginning in 2011), and the location of the question in the survey instrument for that year (i.e. in the Core, Part A only, Part B only, Part C only, or all Parts). Use the following guidelines for choosing the weight (summarized in the table in the opposite column). Note that the CDC introduced a new set of weighting variables in 2011, to reflect the changes to the survey methodology.

- Prior to 2007, use _FINALWT

- 2007 through 2010:
  o Use _FINALWT if the variable is in the Core or if it is in both Parts A and B
  o Use _FINALQ1 if the variable appears in Part A only, and _FINALQ2 for Part B

- For 2011:
  o Use _LLCPWT if the variable is in the Core, which means it was included in all landline surveys and in the cell phone survey
  o Use _LANDWT if the variable is included in all three landline surveys, but not in the cell
  o Use _LNDWTV1 if the variable is in the Part A landline survey only, _LNDWTV2 for Part B, and _LNDWTV3 for Part C.

- For 2012 through 2014:
  o Use _LLCPWT if the variable is in the Core, which means it was included in all landline surveys and in the cell phone survey
  o Use _LANDWT if the variable is included in all three landline surveys, but not in the cell
  o Use _LNDWTV1 if the variable is in the Part A landline survey only, _LNDWTV2 for Part B.
  o Use _LCPWTV1 if the variable is in the Part A cell phone survey or the Part A landline and cell phone survey, _LCPWTV2 for Part B.

- For 2015 - 2021:
  o Use _LLCPWT if the variable is in the Core, which means it was included in all landline surveys and in the cell phone survey
  o Use _LCPWTV1 if the variable is in the Part A survey, _LCPWTV2 for Part B.

Guidelines for Selection of BRFSS Weight Variable

BRFSS Year	Question/Variable Location						
	Part A LL Only	Part A Cell Or Part A LL and Cell	Part B LL Only	Part B Cell Or Part B LL and Cell	Part C LL Only	All Landline	All LL and Cell (Core)
1994 – 2006	*	*	*	*	*	_FINALWT	*
2007 – 2010	_FINALQ1	*	_FINALQ2	*	*	_FINALWT	*
2011	_LNDWTV1	*	_LNDWTV2	*	_LNDWTV3	_LANDWT	_LLCPWT
2012- 2014	_LNDWTV1	_LCPWTV1	_LNDWTV2	_LCPWTV2	*	_LANDWT	_LLCPWT
2015- 2021	*	_LCPWTV1	*	_LCPWTV2	*	*	_LLCPWT

* Not applicable for the year

Maine Behavioral Risk Factor Surveillance System
Data Dictionary 1994 - 2021

To determine which part or arm of the survey question(s) were run, follow these three steps:

1. Check for inclusion of the question in the individual survey questionnaires by clicking on "Yearly Questionnaires" on the Maine BRFSS website (hyperlink referenced on pp. ii).

2. Check Maine's Data Dictionary for information about the question. The "Data Year and Part" column specifies the year and part of the survey that each question was included.

3. Verify any preliminary determination of what part or arm of the survey and what final weight to use by running a crosstab of each variable you plan to use in your analysis with the PART and YEAR variables. (See explanation on the next page.)

Using the PART Variable to Identify Questions from Different Survey Arms

The PART variable is an indicator for whether a respondent was included in the Part A or Part B arm of the BRFSS survey for the split sample years 2007 through 2010, and whether a respondent was included in the Part A, Part B, Part C, or the Cell phone survey in 2011. Note that in years 2012 through 2021, there was no Part C; moreover, parts A and B each have landline and cell phone categories. In 2015-2021, the land and cellphone categories were combined.

The following SAS output shows the frequency of the PART variable for 2010 through 2021.

SAS Output: Table of Year by Part Variable
By running a simple crosstab between PART and the variable you want to analyze for each survey year, you can easily verify whether the question was included in Parts A, B, C and/or the cell phone survey. Use the following guidelines:

Year (YEAR) Frequency	A/Land Cell A	Cell A Only/A Cell	Land A Only/A Landline	B/Land Cell B	Cell B Only/B Cell	Land B Only/B Landline	Core	C	Cell	Total
2010	4060	0	0	4072	0	0	0	0	0	8132
2011	3998	0	0	4011	0	0	0	4061	1173	13,243
2012	0	900	4014	0	936	4026	0	0	0	9876
2013	0	960	3962	0	589	2532	54	0	0	8097
2014	0	1504	3910	0	982	2608	65	0	0	9069
2015	5513	0	0	3467	0	0	83	0	0	9063
2016	5895	0	0	4018	0	0	106	0	0	10,019
2017	5754	0	0	3842	0	0	95	0	0	9691
2018	5971	0	0	4904	0	0	96	0	0	10,971
2019	5599	0	0	5647	0	0	127	0	0	11,373
2020	5380	0	0	5492	0	0	143	0	0	11,015
2021	5796	0	0	5872	0	0	140	0	0	11,808

In years 2012-2021:

Survey Part/Arm	Verify using frequencies:
Not included	All responses are missing for all five categories (Land A Only, Land B Only, Cell A Only, Cell B Only, and Cell Part Unknown)
Core or in all landline and cell parts	Valid (non-missing) responses appear in the following five categories: Core, Land A, Land B, Cell A, Cell B
Core Landline or Land_A_Only and Land_B_Only	Valid landline responses appear in both part A and B landline categories. Other categories have missing values.
Cell A and Landline A	Valid landline and cell phone responses appear in the part A category. Other categories have missing values. (**Use similar process to identify part Cell B and Landline B respondents.**)
Landline A	Valid responses appear for part A landline respondents only. Other categories have missing values. (**Use similar process to identify part Landline B respondents.**)

Prior to 2012:

Survey Part/Arm	Verify using frequencies:
Not included	All responses are missing for all four categories (A, B, C, and Cell).
Core or Parts A, B, C and Cell	Valid (non-missing) responses appear in all four categories.
Part A only	Valid responses appear for Part A respondents only. (All other categories have only missing values.) Use similar process to identify Part B only, or Part C only respondents.

Example: The following shows SAS output for the variable ADDEPEV by PART, for the survey years 2008- 2011 and ADDEPEV2 by PART for the survey year 2012 and 2013.

YEAR=2008

ADDEPEV(EVER TOLD YOU HAD A DEPRESSIVE DISORDER)

9	0	1	4	0	4	9
Total	45	900	4014	936	4026	9921

YEAR = 2013
ADDEPEV2(EVER TOLD YOU HAD A DEPRESSIVE DISORDER)

	PART					
Frequency	Cell_A_ Only	Cell_B_ Only	Core	Land_A_ Only	Land_B_ Only	Total
1	241	162	9	907	551	1870
2	714	427	45	3040	1974	6200
7	5	0	0	10	4	19
9	0	0	0	0	5	8
Total	960	589	54	3962	2532	8097

Explanation: For the year 2008, only respondents from Part A have results that are valid (1, 2, 7 or 9) for the variable ADDEPEV. All 2,697 respondents in Part B are missing responses for ADDEPEV. The results show that ADDEPEV was included only in Part A of the 2008 BRFSS survey, so the variable _FINALQ1 should be used to weight the results for that year.

In 2009 and 2010, ADDEPEV has valid responses for both Part A and Part B respondents, indicating that ADDEPEV was included in both parts of the survey for those two years. For 2009 and 2010, the data should be weighted with _FINALWT.

(Note: The Part C and Cell categories have no valid values for 2008 through 2010 because there was no Part C or cell phone survey included in those years.)

In 2011, ADDEPEV has valid responses for respondents in all three landline arms of the survey (Parts A, B and C), as well as those in the cell phone survey. For 2011, the data should be weighted with _LLCPWT.

In 2012 and 2013, ADDEPEV2 has valid responses for both arms of the survey including landline and cellphone. Thus, this is a Core question and the variable _LLCPWT

should be used as the weight. Please note the following example:

```
proc surveyfreq data=me17brfss;
    table ADDEPEV2 /row cl;
    strata _STSTR; cluster _PSU;
    weight _LLCPWT;     /* 2013 Combined LL/Cell Weight */
run;
```

Example 2: The following shows SAS output for the variable ADANXEV (ever told anxiety) for the survey years 2012 and 2013.

YEAR = 2012
ADANXEV(EVER TOLD YOU HAD AN ANXIETY DISORDER)

Explanation: For the year 2012, respondents from both Part A and B landline surveys have results that are valid for the variable ADANXEV. Notice that Part A of the cell phone survey has 900 respondents that are missing, while Part B of the cell phone survey has 936 respondents with missing data. The results indicate that ADANXEV was included in the landline, but not in the cell phone survey. The 2012 data for ADANXEV should therefore be weighted with _LANDWT. However, for the year 2013, valid non-missing values occur in cell A and B as well as landline A and B categories; therefore, _LLCPWT should be used.

The sample SAS code below could be used with the 2013 BRFSS data to estimate the prevalence of anxiety disorders among Maine adults, along with the appropriate confidence intervals.

```
/*Year 2012*/
proc surveyfreq data = me17brfss;
      table ADANXEV /row cl;
      strata _STSTR;
      cluster _PSU;
      weight _LANDWT;      /* 2012 LL Weight */
run;
```

```
/*Year 2013*/
proc surveyfreq data = me17brfss;
      table ADANXEV /row cl;
      strata _STSTR;
      cluster _PSU;
      weight _LLCPWT;      /* 2013 LL Weight */
run;
```

Weighting Multiple Years Using SAS

The instructions in this section demonstrate a method of combining BRFSS survey data from different years, which is useful for increasing the sample size in situations where you want to examine sub-state populations.

Because of the change to the BRFSS survey methodology in 2011, data from 2011 and on should not be combined with data from earlier years. However, 2011 data can be combined with years after 2011 data using this method.

The following sample SAS DATA and PROC coding show how you would use the combined 2008 – 2010 data to analyze the ADDEPEV variable, which was in Part A only in 2008, and in Parts A and B in 2009 and 2010.

```
data mebrfss;
set me0017_m;
if year = 2008 then NEWFINALWT = _FINALQ1; /* Part A */
if year = 2009 then NEWFINALWT = _FINALWT; /* A & B */
if year = 2010 then NEWFINALWT = _FINALWT; /* A & B */
NEWYEAR = YEAR;
run;

proc surveyfreq data =mebrfss;
table ADDEPEV /row cl;
strata NEWYEAR _STSTR;
cluster _PSU;
```

```
weight NEWFINALWT;
format ADDEPEV depress.;
run;
```

When you are combining multiple years in a SAS analysis,
you need to create a new final weight variable
(NEWFINALWT), assigning the correct weight based on the
survey year and part.

Also note that you need to create a copy of the YEAR
variable (NEWYEAR). The reason behind creating the
NEWYEAR variable is to give SAS the correct sampling
scheme in situations where data from multiple years are
used in the analysis. The standard error, which
ultimately is used in the calculation of the confidence
interval, is calculated incorrectly if some form of YEAR
variable is not used in the strata statement. Also, if
the YEAR variable by itself is used in two places (table
and strata statements), then SAS will not run the
analysis. This method allows SAS to run while still
getting the correct standard error for the calculation
of confidence intervals.

Scoring Algorithms for BRFSS Mental Health Questions

The inclusion of mental health data is considered an ongoing priority for the Maine users of BRFSS data. On a larger scale, the integration of mental health and physical health is an important objective of Maine's public health agency and health care delivery programs.

Beginning in 2006 Maine BRFSS (and national CDC) realized the importance of recognizing various mental health conditions as chronic diseases whose data could be captured by BRFSS. Maine uses data primarily from the Anxiety and Depression Module (A&D Module) disseminated by national CDC. This module includes the PHQ-8 which assesses current symptoms of depression, as well as questions about past diagnosis of depression or anxiety disorder. The PHQ-8 is adapted from the PHQ-9 that is used broadly in clinical practice to diagnose and monitor treatment for depression, so it is familiar to providers across Maine's health care system. The PHQ-8 differs only in the omission of the suicide question on the PHQ-9. Data from the PHQ-8 can be analyzed with two scoring algorithms to estimate the prevalence of two similar (but not identical) depression diagnoses (1) moderate to severe depression or (2)major or other depression. These two algorithms are both included here as the first is used more in primary care practice and the other better matches the diagnostic manuals used in mental health settings. Maine has generally preferred the algorithm for diagnosis of moderate to severe depression, given the emphasis in Maine of promoting screening and treatment of depression in primary care.

The first two questions of the PHQ-8 are validated as the PHQ-2, which is regularly used as a screening tool in clinical practice and is also the screen for depression used in Maine CDC's web based Health Survey, Keep-ME-Well. The A&D Module also included two additional important questions: Ever-told depression and Ever-told Anxiety. In 2007 Maine ran another SAMHSA mental health Section named Serious Psychological Distress, which was only run once in Maine because it did not inform current clinical practice or public health programming. However this Module included a helpful question of "Receiving any mental health treatment" which has been used to estimate the gap between clinically significant depression and access to treatment.

In 2010, National CDC 5 year BRFSS plan created a Chronic Disease Section of its Core survey and "Ever-told Depression" was included among other chronic diseases. In addition, the mental health days question of the Healthy Days Section of the Core survey also produces "Frequent Mental Distress (FMD)" when an individual reports 14 or more mentally unhealthy days per month.

Over the years Maine has mixed and matched these questions as funding and interest evolved. Continuing with the 2014 survey, Maine's consensus is to include the Core chronic disease Section, "ever-told depression"(mandatory) the two questions creating the PHQ-2 (the depression screening questions); one question "ever-told anxiety," and one question "receiving any mental health treatment) in Maine's ongoing surveys. This selection of one core (mandatory) and four state added questions allows for data on lifetime anxiety and depression, screening for current symptoms of depression, and data on those receiving treatment.

Maine Behavioral Risk Factor Surveillance System
Data Dictionary 1994 - 2021

The formats and data step algorithms below can be used to code the mental health variables listed in this table.

BRFSS Mental Health Variables

Variable Name (SAS Format)	Description
NTOTALSCORE (current)	Indicator of moderate to severe depression coded using eight items from the PHQ-8 depression screener.
PHQTWO (phqtwo)	Indicator of current depression coded using the two items from the PHQ-2 depression screener.
NMENTHLTH (fmd)	Frequent Mental Distress, indicates 14 or more mentally unhealthy days per month
MAJDEP (major)	Indicator of major or other depression coded using eight items from the PHQ-8 depression screener
ADDEPEV (everdep)	Variable indicating respondent has ever been told by a doctor or other health care professional that they have depression
ADANXEV (everanx)	Variable indicating respondent has ever been told by a doctor or other health care professional that they have an anxiety disorder
MISTMNT (treatment)	Variable indicating the respondent is now taking medicine or receiving treatment for a mental health condition or emotional problem

```
/*----------------------------------------

ASACTLIM	2005	2007	During the past 12 months, how many days were you unable to work or carry out your usual activities because of your asthma?	1-365= Number of days	
				777=Don't know/Not sure	
				888= None	
				999= Refused	
				Blank= Not asked, Module not used, or Missing	

Variable Name	Data Year and Part		Description	Values	User Information
ASATTACK	2005	2007	During the past 12 months, have you had an episode of asthma or an asthma attack?	1= Yes 2= No 7= Don't know/Not sure	
ASDRVIST	2005	2007	During the past 12 months, how many times did you see a doctor, nurse or other health professional for urgent treatment of worsening asthma symptoms?	1-86= number of visits 87= 87 or more visits 88= none 98= Don't know/Not sure 99= Refused	
ASERVIST	2005	2007	During the past 12 months, how many times did you visit an emergency room or urgent care center because of your asthma?	1-86= Number of visits 87= 87 or more visits 88= None 98= Don't know/Not sure 99= Refused	
ASINHALR	2005		During the past 30 days, how often did you use a prescription asthma inhaler during an asthma attack to stop it?	1= One to four times(in the past 30 days) 2= Five to fourteen times(in the past 30 days) 3= Fifteen to twenty-nine times(in the past 30 days) 4= Thirty to fifty-nine times(in the past 30 days) 5= Sixty to ninety-nine times(in the past 30 days) 6= More than 100 times(in the past 30 days) 7= Don't know/Not sure 8= Never(including no attack in past 30 days) 9= Refused	

Variable Name	Data Year and Part	Description	Values	User Information
ASNOSLEP	2005	During the past 30 days, how many days did symptoms of asthma make it difficult for you to stay asleep?	1= One or two 2= Three to four 3= Five 4= Six to ten 5= More than ten 8= None 9= Refused	
ASRCHKUP	2005	During the past 12 months, how many times did you see a doctor, nurse or other health professional for a routine checkup for your asthma?	1-86= Number of visits 87= 87 or more visits 88= None 98= Don't know/Not sure 99= Refused	This variable is similar to ASM_ROUT (a state added question asked in 02, 03, and 04), but the question in 05 includes the phrase "Besides those emergency room visits".
ASTHMAGE	2005	How old were you when you were first told by a doctor, nurse or other health professional that you had asthma?	11-95= Age 11 to 95 96= 96 and older 97= Age 10 or younger 98= Don't know/Not sure 99= Refused	
ASTHMED2	2005	During the past 30 days, how many days did you take a prescription asthma medication to prevent an asthma attack from occurring?	1= 1-14 days 2= 15-24 days 3= 25-30 days 7= Don't know/Not sure 8= Never 9= Refused	

Variable Name	Data Year and Part		Description	Values	User Information
ASYMPTOM	2005		Symptoms of asthma include cough, wheezing, shortness of breath, chest tightness and phlegm production when you do not have a cold or respiratory infection. During the past 30 days, how often did you have any symptoms of asthma?	1= Less than once a week 2= Once or twice a week 3= More than 2 times a week, but not every day 4= Every day, but not all the time 5= Every day, all the time 7= Don't know/Not sure 9= Refused	
CALLBACK	2009 B 2011 C 2013 2015 A 2017 2019 2021	2010 2012 B LL 2014 A 2016 2018 2020	We would like to call you again within the next 2 weeks to talk in more detail about (your/your child's) experiences with asthma. The information will be used to help develop and improve the asthma programs in <STATE>.	1= Yes 2= No Blank = Not asked or missing	(Question used to identify respondents for Asthma Call Back Survey (ACBS).)
CASTHDX2	2006 2008 2010 A 2012 B 2014 A 2016 2018 2020	2007 2009 B 2011 C 2013 A 2015 A 2017 2019 2021	Has a doctor, nurse, or other health professional EVER said that the child has asthma?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	Asked if CHILDREN >= 1 and < 88

Variable Name	Data Year and Part		Description	Values	User Information
CASTHNO2	2006 2008 2010 A 2012 B 2014 A 2016 2018 2020	2007 2009 B 2011 C 2013 A 2015 A 2017 2019 2021	Does the child still have asthma?	1= Yes 2= No 7= Don't know/Not sure 9= Refused Blank = Not asked or Missing	Asked if CHILDREN >= 1 and < 88 and CASTHDX2 = 1
Asthma: State Added Questions					
ASM_CALL	2006 2008	2007	Would it be okay if we called you back to ask additional asthma-related questions?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	Asked if CASTHDX2 >= 1 and < 88 and RCSRELN1 = 1 or 3
ASM_CAUS	2005		Do you think your asthma was first caused by any job you ever had?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
ASM_JBHM	2005		Have you ever held a job outside the home?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
ASM_ROUT	2002 2004	2003	During the past 12 months, how many times did you see a doctor or other health professional for a routine checkup for your asthma?	1-86= Number of visits 87= 87 or more visits 88= None 89= Don't know/Not sure 99=Refused	This variable is similar to ASRCHKUP (a question in the adult asthma history module asked in 05), but the question in 05 includes the phrase "Besides those emergency room visits".

Variable Name	Data Year and Part		Description	Values	User Information
ASM_TELL	2005		Did you ever tell a doctor or other medical person that your asthma was related to any job you ever had?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
ASM_TOLD	2005		Were you ever told by a doctor or other medical person that your asthma was related to any job you ever had?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
ASM_URGN	2002 2004	2003	Besides emergency room visits, during the past 12 months, how many times did you see a doctor or other health professional for urgent treatment of worsening asthma symptoms?	1-86= Number of visits 87= 87 or more visits 88= None 89= Don't know/Not sure 99= Refused	
ASM_WRSE	2005		Do you think your asthma has ever been made worse by any job you've had?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
WRK_UNBL	2002 2004	2003	During the past 12 months, how many days were you unable to work or carry out your usual activities because of your asthma?	1-86= Number of days 87= 87 or more 88= None 98= Don't know/Not sure 99= Refused

PCPSAAD1	2012 2016 2020	2014 2018	Now, I will ask you some questions about prostate cancer screening. A Prostate-Specific Antigen test, also called a PSA test, is a blood test used to check men for prostate cancer. Has a doctor, nurse, or other health professional EVER talked with you about the advantages of the PSA test?	1 = Yes 2 = No 7 = Don't know/Not Sure 9 = Refused	
PCPSADI1	2012 2016 2020	2014 2018	Has a doctor, nurse, or other health professional EVER talked with you about the disadvantages of the PSA test?	1 = Yes 2 = No 7 = Don't Know 9 = Refused	
PCPSARE1	2012 2016 2020	2014 2018	Has a doctor, nurse, or other health professional ever recommended that you have a PSA test?	1 = Yes 2 = No 7 = Don't Know/Not Sure 9 = Refused	

Variable Name	Data Year and Part		Description	Values	User Information
PCPSARS1	2012 2016 2020	2014 2018	What was the main reason you had this PSA test?	1 = Part of a routine exam 2 = Because of a prostate problem 3 = Because of a family history of prostate cancer 4 = Because you were told you had prostate cancer 5 = Some other reason 7 = Don't Know/No Sure 9 = Refused	
PROSHIST	2001		Has your father, brother, son, or grandfather ever been told by a doctor, nurse, or health professional that he had prostate cancer?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
PROSTATE	2001 2006 2010	2004 2008	Have you ever been told by a doctor, nurse, or other health professional that you had prostate cancer?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
PSATEST	2001 2006 2010 2014 2018	2004 2008 2012 2016 2020	A Prostate-Specific Antigen test, also called a PSA test, is a blood test used to check men for prostate cancer. Have you ever had a PSA test?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	Asked if SEX = 1 and AGE > 39

Variable Name	Data Year and Part		Description	Values	User Information
PSATIME	2001 2004 2008 2012 2016 2020	2002 2006 2010 2014 2018	How long has it been since you had your last PSA test?	1= Within the past year (anytime less than 12 months ago) 2= Within the past 2 years (1 to less than 2 years) 3= Within the past 3 years (2 to less than 3 years) 4= Within the past 5 years (3 to less than 5 years) 5= 5 or more years ago 7= Don't know/Not sure 9= Refused	Asked if PSATEST = 1
SDNATEST	2020		How long since you had this test? (stool DNA)	1 = Within the past year (anytime less than 12 months ago) 2 = Within the past 2 years (1 year but less than 2 years ago) 3 = Within the past 3 years (2 years but less than 3 years ago) 4 = Within the past 5 years (3 years but less than 5 years ago) 5 = 5 or more years ago 7 = Don't know/Not sure 9 = Refused Blank = Not asked or missing	This is also called a FIT-DNA test, a stool DNA test, or a Cologuard test. This test combined the FIT with a test that detects altered DNA in the stool.
SIGMSCPY	2020		A sigmoidoscopy checks part of the colon and you are fully awake. Have you ever had a sigmoidoscopy?	1 = Yes 2 = No 7 = Don't know/Not sure 9 = Refused Blank = Not asked or missing	

Variable Name	Data Year and Part	Description	Values	User Information
SIGMTEST	2020	How long has it been since you have had this test? (sigmoidoscopy)	1 = Within the past year (anytime less than 12 months ago) 2 = Within the past 2 years (1 year but less than 2 years ago) 3 = Within the past 5 years (2 years but less than 5 years ago) 4 = Within the past 10 years (5 years but less than 10 years ago) 5 = 10 or more years ago 7 = Don't know/Not sure 9 = Refused Blank = Not asked or missing	
STOOLDNA	2020	Another test uses a special kit to obtain an entire bowel movement at home and returns the kit to a lab. Have you ever had this test?	1 = Yes 2 = No 7 = Don't know/Not sure 9 = Refused	This is also called a FIT-DNA test, a stool DNA test, or a Cologuard test. This test combined the FIT with a test that detects altered DNA in the stool.
VCLNTEST	2020	How long has it been since you had this test? (virtual colonoscopy)	1 = Within the past year (anytime less than 12 months ago) 2 = Within the past 2 years (1 year but less than 2 years ago) 3 = Within the past 3 years (2 years but less than 3 years ago) 4 = Within the past 5 years (3 years but less than 5 years ago) 5 = 5 or more years ago 7 = Don't know/Not sure 9 = Refused Blank = Not asked or missing	

Variable Name	Data Year and Part	Description	Values	User Information
VIRCOLON	2020	For a virtual colonoscopy, your colon is filled with air and you are moved through a donut shaped X-ray machine as you lie on your back and then on your stomach. Have you ever had a virtual colonoscopy?	1 = Yes 2 = No 7 = Don't know/not sure 9 = Refused	

Cancer: Module

Variable Name	Data Year and Part	Description	Values	User Information
CSRVCTL2	2020 A	Would you say your pain is currently under control…?	1 = With medication (or treatment) 2 = Without medication (or treatment) 3 = Not under control, with medication (or treatment) 4 = Not under control, without medication (or treatment) 7 = Don't know / Not sure 9 = Refused	Cancer Survivorship: Pain Management
CSRVDEIN	2020 A	Were you ever denied health insurance or life insurance coverage because of your cancer?	1 = Yes 2 = No 7 = Don't know/not sure 9 = Refused	

Variable Name	Data Year and Part	Description	Values	User Information
CSRVDOC1	2020 A	What type of doctor provides the majority of your health care?	1 = Cancer Surgeon 2 = Family Practitioner 3 = General Surgeon 4 = Gynecologic Oncologist 5 = General Practitioner, Internist 6 = Plastic Surgeon, Reconstructive Surgeon 7 = Medical Oncologist 8 = Radiation Oncologist 9 = Urologist 10 = Other 77 = Don't know / Not sure 99 = Refused	
CSRVINSR	2020 A	With your most recent diagnosis of cancer, did you have health insurance that paid for all or part of your cancer treatment?	1 = Yes 2 = No 7 = Don't know/not sure 9 = Refused	Health insurance also includes Medicare, Medicaid, or other types of state health programs.
CSRVPAIN	2020 A	Do you currently have physical pain caused by your cancer or cancer treatment?	1 = Yes 2 = No 7 = Don't know/not sure 9 = Refused	

Variable Name	Data Year and Part	Description	Values	User Information
CSRVTRT3	2020 A	Are you currently receiving treatment for cancer?	1 = Yes 2 = No, I've completed treatment 3 = No, I've refused treatment 4 = No, I haven't started treatment 5 = Treatment was not necessary 7 = Don't know/not sure 9 = Refused	By treatment, we mean surgery, radiation therapy, chemotherapy, or chemotherapy pills.
HADPRC_C	1994 1995 1997	A sigmoidoscopy or proctoscopy is when a tube is inserted in the rectum to view the bowel for signs of cancer and other health problems. Have you ever had this exam?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
HADRECTL	1994 1995	A digital rectal exam is when a doctor or other health professional inserts a finger in the rectum to check for cancer and other health problems. Have you ever had this exam?	1= Yes 2= No 7= Don't know/Not sure 9= Refused	
LASTEXAM	1994 1995	When did you have your last digital rectal exam?	1= Within the past year (1 to 12 months ago) 2= Within the past 2 years (1 to 2 years ago) 3= Within the past 5 years (2 to 5 years ago) 4= 5 or more years ago 7= Don't know/Not sure 9= Refused	

Variable Name	Data Year and Part		Description	Values	User Information
LASTPROC	1994 1997	1995	When did you have your last proctoscopy exam?	1= Within the past year (1 to 12 months ago) 2= Within the past 2 years (1 to 2 years ago) 3= Within the past 5 years (2 to 5 years ago) 4= 5 or more years ago 7= Don't know/Not sure 9= Refused	
LCSCTSCN	2017 B 2019 2021	2018 2020	In the last 12 months, did you have a CT or CAT scan?	1= Yes, to check for lung cancer 2= No (did not have a CT scan) 3= Had a CT scan, but for some other reason 7= Don't know/not sure 9= Refused

Variable Name	Data Year and Part		Description	Values	User Information
_IMPAGE	1994	1995	Age value used to determine age groups	18-24 = Age 18 to 24 25-34=Age 25 to 34 35-44=Age 35 to 44 45-54=Age 45 to 54 55-64=Age 55 to 64 65-99=Age 65 or older	Imputed age used in weighting process. (This value is the reported age or an imputed age, if the respondent refused to give an age. The value of the imputed age will be an average age computed from the sample if the respondent refused to give an age.)
	1996	1997			
	1998	1999			
	2000	2001			
	2002	2003			
	2004	2005			
	2006	2007			
	2008	2009			
	2010	2011			
	2012	2013			
	2014	2015			
	2016	2017			
	2018	2019			
	2020	2021			
_IMPEDUC	2011	2012	IMPUTED EDUCATION LEVEL	1=Never attended school or only kindergarten 2=Grades 1 through 8 (Elementary) 3=Grades 9 through 11 (Some high school) 4=Grade 12 or GED (High school graduate) 5=College 1 year to 3 years (Some college or technical school) 6=College 4 years or more (College graduate)	This value is the reported education level or an imputed education level, if the respondent refused to give an age. The value of the imputed age will be an average age computed from the sample if the respondent refused to give an education level.
	2013	2014			
	2015	2016			
	2017	2018			
	2019	2020			
	2021				
_IMPHOME	2011	2012	IMPUTED RENT OR OWN HOME STATUS	1=Own 2=Rent 3=Other arrangement	This value is the reported tenure (rent or own home) or an imputed tenure, if the respondent refused to give an age. The value of the imputed age will be an average age computed from the sample if the respondent refused to give a tenure.
	2013	2014			
	2015	2016			
	2017	2018			
	2019	2020			
	2021				

Variable Name	Data Year and Part		Description	Values	User Information
_IMPMRTL	2011 2013 2015 2017 2019 2021	2012 2014 2016 2018 2020	IMPUTED MARITAL STATUS	1=Married 2=Divorced 3=Widowed 4=Separated 5=Never married 6=A member of an unmarried couple	This value is the reported marital status or an imputed marital status, if the respondent refused to give an age. The value of the imputed age will be an average age computed from the sample if the respondent refused to give a marital status.
_IMPNPH	2000 2002 2004 2006 2008 2010 2012 LL 2014 LL 2016 2018 2020	2001 2003 2005 2007 2009 2011 LL 2013 LL 2015 2017 2019 2021	Imputed number of phones used in weighting	1-8 (8=8+)	
_IMPRACE	2011 2013 2015 2017 2019 2021	2012 2014 2016 2018 2020	IMPUTED RACE/ETHNICITY VALUE	1=White, Non-Hispanic 2=Black, Non-Hispanic 3=Asian, Non-Hispanic 4=American Indian/Alaska Native, Non-Hispanic 5=Hispanic 6=Other race, Non-Hispanic	This value is the reported race/ethnicity or an imputed race/ethnicity, if the respondent refused to give a race/ethnicity. The value of the imputed race/ethnicity will be the most common race/ethnicity response for that region of the state.

USENOW3	2009 A B 2011 2013 2015 2017 2019 2021	2010 A B 2012 2014 2016 2018 2020	Do you currently use chewing tobacco, snuff or snus every day, some days, or not at all?	1= Every day 2= Some days 3= Not at all 7= Don't know/Not sure 9= Refused	** Note: Due to an error, this question appeared in both the Core and in Part B of the 2009 and 2010 surveys. USENOW3 has responses from the Core (Part A and B) question, and USENOW2 has results from the state added question in Part B only. To obtain prevalence rates for 2009, we recommend using USENOW3 because of the larger sample. For multiple-year comparisons that include 2009 and prior years, it is necessary to combine USENOW3 with USENOW2.
