# **INTRODUCTION**

# MEFIRS 2009 ANNUAL REPORT

## Foreword

The Office of State Fire Marshal provides the following report. This report is a direct result of the incident data provided by departments that reported to the Maine Fire Information Reporting System. The data imported to the Fire Marshal's Office has been validated using the NFIRS 5.0 Data Entry / Validation Tool, Version 5.4.1 for completeness and accuracy. During the import of local fire department data into the State's MEFIRS data server, any corrective action needed by fire departments is returned for additional attention. As a result of these quality assurance activities, the data maintained and reported is an accurate summary of the incident event as it happened and recorded within the National Fire Incident Reporting System at the United States Fire Administration.

Upon completion of the data validation process, the Office of State Fire Marshal exports the cumulative State MEFIRS data to the U.S. Fire Administration. Following the export of the State of Maine MEFIRS data to the U.S. Fire Administration, it is released for fire service and public access.

The MEFIRS 2009 Annual Report has been generated using the Web-based Reporting Tool of the National Fire Incident Reporting System. The NFIRS 5.0 Web-based reports utilize Actuate information delivery technology in providing summary and statistical information from fire department and incident data saved to the National Database. Report executables are predefined according to NFIRS 5.0 reporting requirements established by the U.S. Fire Administration. Two types of reports have been included in this report. Management reports, which provide summary information as specified by the report query, and reports with user-specified parameters have been populated with data provided by the Fire Departments of the State of Maine for the development of this report.

# **THE MAINE FIRE INCIDENT REPORTING SYSTEM**

## **“FIGHTING FIRE WITH FACTS”**

### **MEFIRS – AN OVERVIEW**

The Maine Fire Incident Reporting System is an information and data gathering system initiated and supported by the Office of State Fire Marshal. The goal of the Maine Fire Incident Reporting System, or MEFIRS, is to encourage the use of a standardized incident reporting system as a means of addressing the State's fire problem and related emergency services issues. Through its use, the Maine Fire Incident Reporting System can play a major role in reducing injuries, fatalities, and economic losses from fire and related emergencies by facilitating the collection, compilation, analysis, and use of data to produce and disseminate the information needed by decision makers. Maine statute, Title 25 MRSA § 2395, requires that Fire Chiefs shall submit to the State Fire Marshal an incident report for each response made, regardless of whether an actual fire occurred. The report must be submitted in a manner consistent with a national fire incident reporting system.

As the collection and use of accurate incident data is critical to the decision making process for identification of fire problems at local, state, and federal levels, the United States Fire Administration developed NFIRS as a means of assessing the nature and scope of the fire problem in the United States. The U.S. Fire Administration and the National Fire Information Council jointly manage NFIRS. NFIC is a users' group comprised of state agencies and metropolitan fire departments that are responsible for fire data collection and analysis. In the State of Maine, the Office of State Fire Marshal functions as the states' fire service representative to the National Fire Information Council. The heart and sole of the system is the more than 14,000 fire departments, dispersed across the country, that participate and report their data to the National Fire Incident Reporting System.

After returning from an incident, fire departments make out the appropriate NFIRS reports. These reports are provided in an electronic computer software application within a fire and records management system. These standard NFIRS forms contain a core of information common to every state's reporting system. Local fire departments forward completed NFIRS form data, which are filled out by the computer based application, to the state agency responsible for NFIRS data. The Office of State Fire Marshal electronically submits data compiled from all participating jurisdictions to the U.S Fire Administration. Annual NFIRS data are used as the basis for the U.S. Fire Administration's publication "Fire In The United States", which is the single most comprehensive reference on the nature and scope of the fire problem in the United States.

## **STATE USES OF MEFIRS**

Perhaps the most fundamental use of MEFIRS is in understanding the nature of the fire problem, whether conceived at the local, state, or national level. One indicator of the usefulness of the reporting system is its utilization by the State Fire Marshal's Office in the preparation of the annual report. This information that is gathered from local fire departments provides a resource of statistical data that can then be shared statewide to assist local fire chiefs in determining fire trends and specific areas of fire loss that may need to be addressed. The application of the Maine Fire Incident Reporting System provides the critical link to this data collection sharing.

## **LOCAL FIRE DEPARTMENT USES OF MEFIRS**

Because of the number of departments that are using MEFIRS, it is difficult to document all of the ways that they are using the data. For departments, in the State of Maine, that rely heavily on MEFIRS for reporting fire statistics, an important advantage is that the local fire departments can compare their own productivity and effectiveness with the State average. They can also seek out statistics on fire departments in communities similar to their own and conduct comparisons. The rich resources available through the Maine Fire Incident Reporting System allow a local fire department to conduct many sophisticated analyses that include the identification of trends in the number of calls to the fire department, the types of calls made, and the origin of calls. This information might be used to determine the best location for a fire station. Data acquired can also provide justification of fire department budgets to the city or town council. The system will allow the fire department to count, for example, the number of brush fires to which it has responded, identify whether the trend is upward or downward, and then make an assessment as to whether the department has enough brush fire resources available to meet the demands for service. There is little doubt that MEFIRS has stimulated many local fire departments to use hard data for their fire protection management decision-making and to improve local fire service delivery.

## **THE FUTURE OF MEFIRS AND LOCAL FIRE DEPARTMENT USE**

Because of the number of departments that are using MEFIRS, it is difficult to document all of the ways that they are using the data. For departments, in the State of Maine, that rely heavily on MEFIRS for reporting fire statistics, an important advantage is that the local fire departments can compare their own productivity and effectiveness with the State average. They can also seek out statistics on fire departments in communities similar to their own and conduct comparisons. The rich resources available through the Maine Fire Incident Reporting System allow a local fire department to conduct many sophisticated analyses that include the identification of trends in the number of calls to the fire department, the types of calls made, and the origin of calls. This information might be used to determine the best location for a fire station. Data acquired can also provide justification of fire department budgets to the city or town council. The system will allow the fire department to count, for example, the number of brush fires to which it has responded, identify whether the trend is upward or downward, and then make an assessment as to whether the department has enough brush fire resources available to meet the demands for service. There is little doubt that MEFIRS has stimulated many local fire departments to use hard data for their fire protection management decision-making and to improve local fire service delivery.

# MEFIRS 2009 ANNUAL REPORT

## Data Sources and Analysis

The data used for this report was received from fire departments throughout the State of Maine. The data was imported into the MEFIRS database. Imported fire department data is validated for NFIRS compliance and provided quality assurance assessment by the Office of State Fire Marshal. Upon complete validation, data is then exported to the United States Fire Administration. As data analysis by the Office of State Fire Marshal provides quality assurance of known statewide issues, it is assumed that the integrity of each data element was reviewed at the local level.

During 2009, usable MEFIRS data was received by 192 Fire Departments. This data provided a total of 83,744 incidents. Of this total, the breakdown of this data consisted of 5,172 fire related incidents, 53,372 EMS incidents, and 25,192 non-Fire & non-EMS incidents. It should be noted that these counts exclude “No Activity” incidents.

The departments reporting in this report experienced the following losses:

### Incident Loss

Property Loss = \$29,053,307.00  
Contents Loss = 12,104,223.00  
\$41,157,530.00

### Pre-Incident Value

Property Value = \$95,007,097.00  
Contents Value = 51,714,587.00  
\$146,721,684.00

The amounts above of Pre-Incident Value and Incident Loss reflect the fact that the Fire Departments in the State of Maine saved \$105,564,154.00 in property and contents last year as a result of their department’s response and actions taken.

**OFFICE OF THE STATE FIRE MARSHAL**

# **THE OFFICE OF STATE FIRE MARSHAL**

## **JOHN C. DEAN, STATE FIRE MARSHAL**

The primary function of the State Fire Marshal is to protect lives and property from fire. It is the duty of the State Fire Marshal to enforce all laws, ordinances and rules directed toward and concerned with the prevention and containment of fire and the protection of life and property. The State Fire Marshal is responsible for the suppression of arson and the investigation of cause, origin and the circumstances of fires. In addition, the Fire Marshal has under his domain, the storage, sale and use of combustibles, flammables and explosives. Building safety and fire prevention efforts responsibilities include such focus areas as the installation, maintenance or sale of automatic and other fire alarm systems and fire extinguishing systems; the construction, maintenance and regulation of fire escapes; as well as the adequacy of means of egress in case of fire from buildings.

The Division of State Fire Prevention was created in 1937 to combat an increasing number of fraudulent insurance claims resulting from set fires. Since then there has been a substantial growth in the areas of responsibility of the State Fire Marshal's Office, which replaced the Division of State Fire Prevention in 1972. The scope of statutory authority has broadened to include a number of activities related to life safety as well as fire prevention.

The functions of the State Fire Marshal have primary goals of:

1. Investigation of the cause and origin of fires and explosions;
2. Arson investigation, evidence gathering and case preparation for possible prosecution;
3. Regulate, permit and inspect for the use of explosives, fireworks and certain flammable liquids;
4. Inspect approximately 25 different types of buildings and facilities with the primary focus to enforce life safety codes and standards;
5. Review plans to issue permits for construction and alteration of public buildings, handicap accessibility, installation of fire alarm and fire sprinkler systems; installation of above ground fuel storage tanks, amusement rides, and self-service gas stations;
6. Conduct and offer specialized training for trade professionals, care givers, code enforcement officials, and fire and law enforcement professionals; and
7. Coordinate specialty subject areas such as the State of Maine Juvenile Fire Safety Collaborative that was created by a Governor's Executive Order.

# THE OFFICE OF STATE FIRE MARSHAL DIVISIONS

The Office of the State Fire Marshal is Maine's leading fire investigation, prevention, fire research, and fire and life safety education and awareness organization. All activities of the Fire Marshal's Office are driven by an assessment of Maine's unique fire burden. Understanding the many direct and indirect social and economic costs of fire and the cost to benefits ratio of particular fire suppression, mitigation, law enforcement, and regulatory practices employed by Maine's fire service is a central concern of the Fire Marshal. The data from that assessment provides the basis from which the Fire Marshal directs all legislative, rule making, public education/awareness, and policy initiatives. The assessment is based upon nationally and internationally recognized methods of fire research and data analysis. The Fire Marshal's Office now assesses Maine's fire burden annually.

## **Investigations Division**

The Fire Marshal has three investigative offices with a total complement of 13 sworn officers located in the northern, central and southern regions of Maine. Investigators determine the cause and origin of all fires causing death and injury, suspicious fires and explosions, and pursue criminal investigative activities in addition to providing training to municipal fire investigation officers. Fire investigators work closely with the Portland office of ATF and the two agencies investigate many fires and explosions jointly.

**Northern Investigations Office** Located in Bangor under the supervision of Sgt. Tim York, these officers investigate fires in Aroostook, Piscataquis, Washington, Hancock, Waldo and Penobscot counties.

**Central Investigations Office** Located in Augusta under the supervision of Sgt. Ken Grimes, these officers investigate fires in Somerset, Kennebec, Lincoln, Knox, Sagadahoc, Waldo and Hancock counties.

**Southern Investigations Office** Located in Portland under the supervision of Sgt. Joel Davis, these officers investigate fires in York, Oxford, Androscoggin, Franklin, and Cumberland counties.

## **Fire Prevention Division**

This division is located in Augusta under the supervision of Nelson Collins, Fire Inspectors conduct inspections of public assemblies in addition to DHHS, DOC and other government licensed occupancies for compliance with fire safety and life safety codes as well as federal ADA regulations. The Inspections Unit conducts inspections of these facilities throughout the State of Maine and provides training to constituencies managing facilities that house vulnerable populations.

**Construction Plans Review** Located in Augusta under the supervision of Nelson Collins, the Plans Review Unit identifies and provides consultation to correct life safety issues and fire hazards in all public assemblies and DHHS, DOC and other government licensed occupancies. All major construction projects in Maine must be reviewed by the Fire Marshal's Office for life safety, fire sprinkler and code compliance. Those construction plans reviews include businesses as well as day care facilities, schools, assisted living and numerous other public buildings. Plans are reviewed out of this office for construction in all 16 counties.

**Engineering and Sprinkler Plans Review** Our office carries out several safety agendas under Eric Ellis who is a licensed Fire Protection Engineer. His predominant responsibility is the regulation of the fire sprinkler industry, with its nearly 300 licensees and the review of over 700 fire sprinkler system plan submittals annually. He also typically does field inspections for 20 to 25% of these to verify that standards are maintained and to solve technical installation issues. Statistical analysis summaries of industry trends are provided to the licensed industry, as is education and training.

In addition, Eric is our AutoCAD expert, dealing with computer-aided design projects plus those plan submittals that are done electronically.

It is this area of our office that pioneers the full capabilities of the electronic tools that are available to us, in order to maximize our efficiency so that services to the public can be expanded and enriched. Examples include: online services for license renewals and permit submittals complete with the ability to make payments electronically; developing a scanning & electronic storage/ retrieval system for blueprints; maintaining regular communication with the licensed industry through "weekly" group emails; and establishing a website with links and regularly-updated databases and reference resources. The latest project, now in its completion, has been to develop & test tools & procedures to do the majority of this work long-term from out-of-state so that services remain uninterrupted when staff is temporarily away, such as for training.

With a licensed Professional Engineer as part of our team, we have an in-house contact person for researching code issues that involve either multiple and/or unfamiliar codes, complex mathematical studies such as fire dynamics or fire protection system problems, and for evaluating various types of technical reports. Questions of an engineering nature are funneled to this part of our office. The various constituent groups are pleased to have such professional expertise so readily available.

## **Research**

The research staff is located in Augusta under the supervision of Assistant Fire Marshal Joseph Thomas. The research unit collects data on fire incidents from Maine's Fire Departments through the Maine Fire Incident Reporting System (MEFIRS) for annual reporting. That information is made available to local decision makers in reviewing fire department response times, fire incident types, causes and strategies. Specialized topical research on various elements of Maine's fire burden such as fire fatalities, injuries, trends and the economics of fire is designed, implemented and modeled for statistical analysis by the Senior Research and Planning Analyst, Richard Taylor. The specialized research is shared with constituencies throughout Maine in an effort to augment fire prevention and safety.

## **Public Education/Awareness and Special Projects**

Florian Hall, opened in late 2005, has been used by Maine's fire service community for fire codes and standards training, seminars, specialized informational activities focused on pipeline security, sprinkler and smoke detection systems, injury prevention, and other special events.

The Office of State Fire Marshal sponsored two summer interns through the Muskie School that conducted Play Safe / Be Safe presentations to children in day care facilities throughout the State.

*Maine Fire Marshal News*, a quarterly newsletter distributed to a wide range of interests in both the public and private sectors continues to be a very successful effort.

## 2009 State of Maine Fatal Fire Incidents

TOWN	DATE	TIME	SEX	CAUSE - OCCUPANCY
Augusta	1-1-09	04:24	F 54	Apartment – Undetermined.
Wells	1-8-09	00:17	M 39	Apartment – Murder & Arson – Poured gasoline on husband; set apartment on fire.
Thorndike	1-20-09	12:31	F 82	Single Family Dwelling – Accidental - Ignited clothing material while cooking.
Searsport <b>DOUBLE FATAL</b>	2-16-09	06:15	M 80 F 28	Single Family Dwelling – Accidental – Electrical Power Strip.
North Berwick <b>DOUBLE FATAL</b>	7-5-09	3:35	M 28 F 23	Single Family Dwelling – Accidental – Electrical; originated in wall cavity at ground fault receptacle.
Lewiston	8-17-09	3:45	F 9	Apartment – Accidental – Unattended burning candle.
Gorham <b>DOUBLE FATAL</b>	8-19-09	5:15	F 41 M 12	Vehicle – Incendiary – Homicide; Suicide.
Mechanic Falls	11-25-09	11:04	M 46	
Cherryfield	12-9-09	4:15	M	Single Family Dwelling – Accidental – Victim died while failing to escape to extinguish fire.
Sanford	12-13-09	12:01	M 49	Apartment - Accidental – Careless disposal of smoking material.
Woolwich	12-19-09	8:57	M 61	Single Family Dwelling – Accidental – Clothing ignited while attempting to light a cigarette.

## **Fire Marshal History**

The history of the State Fire Marshal's Office has evolved from the creation in 1937 as the Division of State Fire Prevention, to combat fraudulent insurance claims. On July 1, 1972, the division was transferred to the newly created Department of Public Safety. The following year the bureau's name was changed to the Office of State Fire Marshal. The following have served in the role of

State Fire Marshal:

Director Joseph A.P. Flynn 1939 to 1965

Director and Fire Marshal Charles F. Rogan 1965 to 1975

Fire Marshal Don Bissett 1977 to 1991

Fire Marshal Dennis Lundstedt 1992 to 1995

Fire Marshal Ladd Alcott 1995 to 1998

Fire Marshal John C. Dean 1998 to present

## **Maine Fire Deaths**

Since 1950, the Office of State Fire Marshal has kept detailed records of fire deaths in the state. The 1990s was the safest decade, thanks to the prominent use of smoke detectors, improved building codes and increased fire prevention programs by local fire departments.

1950 to 1959 – 484 deaths

1960 to 1969 – 493 deaths

1970 to 1979 – 498 deaths

1980 to 1989 – 324 deaths

1990 to 1999 – 200 deaths

2000 - 17 deaths

2001 - 18 deaths

2002 - 16 deaths

2003 - 20 deaths

2004 - 18 deaths

2005 - 23 deaths

2006 - 15 deaths

2007 - 12 deaths

2008 - 15 deaths

## **Maine's Deadliest Fires Since 1945**

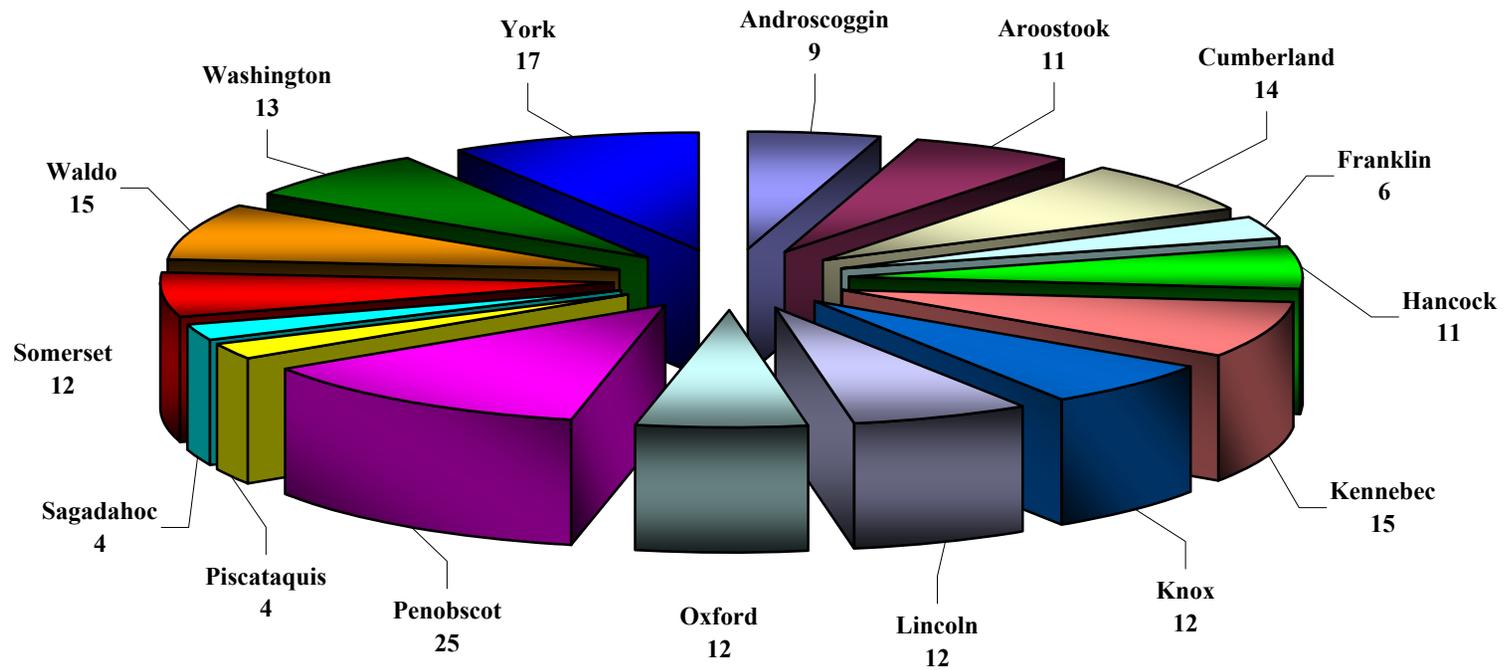

1/31/45	Auburn, 17 killed, one nurse and 16 infants at Le Coste Baby Home
1947	Forest fires, 15 killed and over 200,000 acres burned. Damage over \$30 million dollars
3/2/50	Monson, eight killed, 2 adults and 6 children
3/27/60	Winthrop, six killed, a mother and 5 children
12/15/63	Portland, six killed, 6 children
7/4/67	Oxford, eight killed, 3 adults and 5 children
9/20/84	Hartland, five killed, 1 adult and 4 children

## **Fires Since 1990 With Three or More Deaths**

10/26/90	Corinna, four dead, 1 adult and 3 children
6/7/90	Milo, three dead
2/18/91	Topsham, three dead, 3 adults
12/3/92	Portland, four dead, 3 adults and 1 child
1/23/92	Kittery, three dead, 3 adults
2/3/93	Augusta, three dead, 1 adult and 2 children
6/19/93	New Sweden, three dead, 1 adult and 2 children
9/5/94	Kittery, three dead, 1 adult and 2 children
4/23/97	Lewiston, three dead, 1 adult and 2 children
5/31/98	Madison, three dead, 1 adult and 2 children
1/11/99	Surry, three dead, 3 adults
1/13/00	Unity, four dead, 3 children and Unity Fire Chief collapses and dies at fire scene
2/28/06	Limestone, two adults and 1 child
3/12/11	Unity, three adults

# MEFIRS - Incident Counts

Report Period: From 01/01/2009 to 01/01/2010

## Summary:

Total Incidents: 83,744

FDIDs with Incidents: 192

## Breakdown by Category:

	Count	Percent
<b>Breakdown by Status:</b>		
Valid:	83,736	99.99 %
Invalid:	0	0.00 %
No Activity Incidents:	8	0.01 %
<b>Breakdown by Release:</b>		
Unreleased:	0	0.00 %
Released:	83,744	100.00 %
<b>Breakdown by Version:</b>		
NFIRS Version 4.1:	0	0.00 %
NFIRS Version 5.0:	83,744	100.00 %
<b>Breakdown by Exposure:</b>		
Primary:	83,717	99.97 %
Exposure:	27	0.03 %
<b>* Breakdown by Mutual Aid:</b>		
Aid Given:	5,503	6.57 %
Aid Received:	4,013	4.79 %
Aid None:	74,220	88.64 %
<b>* Breakdown by Type:</b>		
Fires:	5,172	6.18 %
EMS Only:	53,372	63.74 %
Non-Fire & Non-EMS:	25,192	30.09 %

\* - The "Breakdown by Mutual Aid" and "Breakdown by Mutual Type" sections exclude "No Activity" Incidents. Additionally "Mutual Aid, Other" incidents are counted as "Aid None" under the "Breakdown by Mutual Aid" section.

# **GLOSSARY OF TERMS**

# Glossary of Terms

The terminology used in this report is taken from common terms used in the National Fire Protection Association and the National Fire Incident Reporting System. A description of a few of those terms is as follows:

## **ALARM**

Any notification made to the fire department that a situation exists or may exist that requires a response.

## **AREA OF ORIGIN**

The room or area within the property where the fire originated.

## **AUTOMATIC**

As applied to fire protection devices, a device or system providing an emergency function without the necessity of human intervention.

## **AUTOMATIC AID**

Predetermined and preauthorized two-way assistance rendered between departments under the terms of a written agreement.

## **BUILDING**

A structure enclosed with walls and a roof and having a defined height.

## **BUILDING CODE TYPE**

Building code classification of the building involved in the incident.

## **BUILDING FIRE (also structure fire)**

Any fire occurring inside or involving a building. A building fire may be a wastebasket, a mattress fire, or a roof fire, whether or not structural members were actually involved.

## **CASUALTY – CIVILIAN**

A civilian who is injured or killed at the scene of a fire.

## **CASUALTY – FIRE PERSONNEL**

Fire personnel who are injured or killed as a result of responding to, handling, or returning from an incident.

## **COMBUSTIBLE**

A material or structure that will burn.

## **FIRE AREA**

The space within a structure bound by fire division assemblies (two-hour fire rating or greater).

## **FORM OF HEAT (see HEAT OF IGNITION)**

## **FORM OF MATERIAL (see MATERIAL FIRST IGNITED)**

# Glossary of Terms

## **GENERAL PURPOSE USE**

The general use of land or space under the same management, ownership, or within the same legal boundaries; including any structures, vehicles or other appurtenances thereon.

## **HAZARDOUS MATERIAL**

Any material that is an air-reactive material, flammable, or combustible liquid, flammable gas, corrosive material, explosive material, organic peroxide, oxidizing material, radioactive material, toxic material, unstable material or reactive material, and any substance or mixture of substances that is an irritant, a strong sensitizer, or that generates pressure through exposure to heat, decomposition, or other means.

## **HEAT OF IGNITION**

The heat energy that brings about ignition. Heat energy comes in various forms and usually from a specific object or source. Therefore, the heat of ignition is divided into two parts: "equipment involved in ignition" and "form of heat of ignition."

## **IGNITION FACTOR**

The condition or situation that allowed a heat source and a combustible material to combine to initiate a fire.

## **MATERIAL FIRST IGNITED**

The combustible that is first set on fire by the heat of ignition. To be meaningful, both a type of material and a form of material must be identified.

## **MUTUAL AID**

Assistance provided under a written agreement that establishes general guidelines and procedures for providing and receiving assistance between fire departments. (Requested in addition to initial dispatch)

## **STRUCTURE FIRE (Residential & Commercial)**

Any fire inside a structure or on, under or touching a structure. A structure fire may be an automobile fire in a tunnel, a leaking flange in a refinery tower, or a building.

## **PROPERTY MANAGEMENT**

Identification of who controls the property where the incident occurred.

## **SPECIFIC PROPERTY**

The use to which a specific space, structure, or portion of a structure is put by the owner, tenant, or occupant of the space.

## **WILDFIRE**

Any uncontrolled fire burning in wild land vegetation, including any structures or other improvements thereon.

## **WILDLAND**

Land in an uncultivated, more or less natural state, and covered.
