

## POCASSET LAKE

Wayne Twp., Kennebec Co.  
U. S. G. S. Livermore, Me.

### Fishes

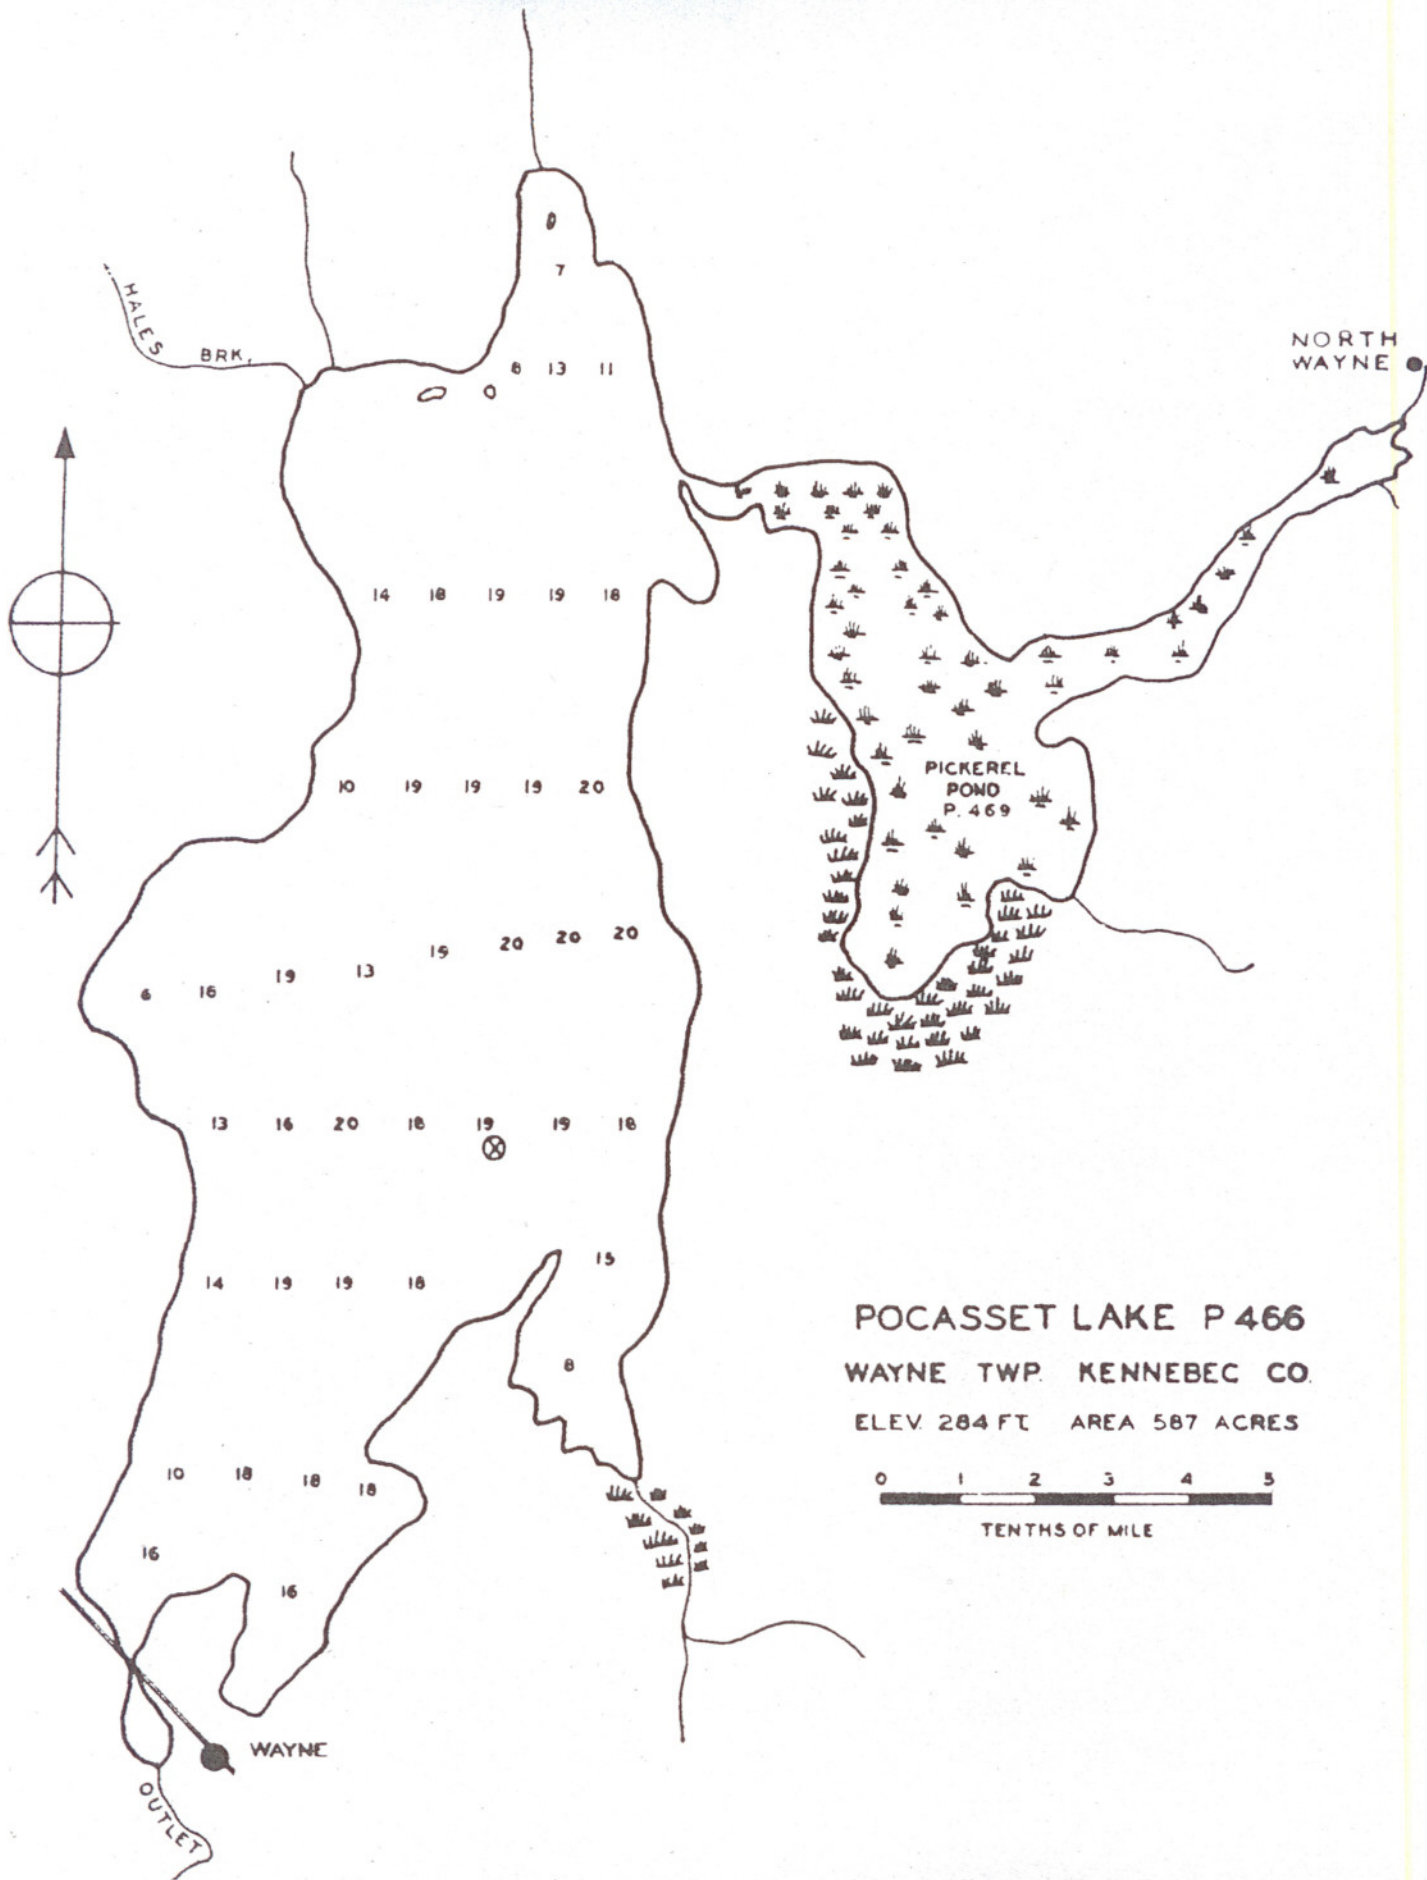

Smallmouth bass	Eel
Largemouth bass	White sucker
White perch	Minnnows
Yellow perch	Golden shiner
Chain pickerel	Fallfish
Hornpout (bullhead)	Pumpkinseed sunfish

### Physical Characteristics

Area - 587 acres	Temperatures
	Surface - 69° F.
Maximum depth - 20 feet	19 feet - 68° F.

### Suggested Management

The survey of Pocasset Lake classified the lake as a warm-water lake having no trout or salmon water. Past stockings of brown trout in the lake have been unsuccessful. Management of the lake for warm-water fishes is recommended.
