Air Quality Conformity Analysis

INTRODUCTION

This report documents the air quality conformity determination for the re-adoption of *Connecting Maine,* Maine's 2035 Long-Range Transportation Plan (LRP) and the 2012-2015 Statewide Transportation Improvement Program (STIP). The report was prepared by the Maine Department of Transportation (MaineDOT) and the Maine Department of Environmental Protection (MaineDEP) in coordination with the PACTS and KACTS Metropolitan Planning Organizations (MPO).

Transportation conformity is required under the Clean Air Act (CAA) and the Clean Air Act Amendments of 1990 (CAAA). The purpose of the transportation conformity process is to ensure that federally funded or approved transportation projects, programs and plans are reviewed and evaluated for their impacts on air quality. Specifically, the projects and other federally funded activities contained in the LRP or STIP may not cause or contribute to new violations, exacerbate existing violations, or interfere with the timely attainment of air quality standards. The transportation conformity process requires the active participation of all agencies (federal, state, and local) that implement federally funded transportation projects and programs within the Portland and Midcoast areas.

This report demonstrates transportation conformity to the 8-hour ozone National Ambient Air Quality Standards for Maine's two ozone maintenance areas. This analysis has been prepared in accordance with U.S. Environmental Protection Agency's (EPA) final conformity rule. The following sections of this report briefly discuss Maine's air quality designations, identify the applicable transportation plans/program in the conformity analysis, describe the interagency consultation process, highlight the methodology used to perform the current analysis, and present the final conformity determination.

MAINE'S AIR QUALITY DESIGNATIONS

The CAA requires EPA to set National Ambient Air Quality Standards (NAAQS) for pollutants considered harmful to public health and the environment. The CAA established two types of national air quality standards. Primary air quality standards set limits to protect public health, including the health of "sensitive" populations such as asthmatics, children, and the elderly. Secondary air quality standards set limits to protect public welfare, including protection against decreased visibility, damage to animals, crops, vegetation, and buildings.

The EPA Office of Air Quality Planning and Standards (OAQPS) has set NAAQS for six principal pollutants, which are called "criteria" pollutants. The six criteria pollutants are carbon monoxide, lead, nitrogen oxides, particulate matter, ozone, and sulfur dioxides. Areas that do not meet the NAAQS are designated as nonattainment areas and, as a result, are subject to transportation conformity. Maintenance areas are geographic regions that were previously designated as nonattainment, but are now consistently meeting the NAAQS. Transportation

conformity requires nonattainment and maintenance areas to demonstrate that all future transportation projects will not hinder the area from reaching and maintaining its attainment goals.

Maine currently has two regions (Portland and Midcoast) designated as maintenance areas for the 8-hour ozone standard and one small area (downtown Presque Isle) designated as a maintenance area for PM_{10}. No carbon monoxide, lead, nitrogen oxides, or sulfur dioxide nonattainment areas have been identified in Maine.

Ozone

In 1997, the EPA issued the 8-hour Ozone NAAQS. Based on the available evidence, EPA determined that the previous 1-hour ozone standard was inadequate for protecting public health. Scientific information shows that ozone can affect human health at lower levels, and over longer exposure times than one hour. The 8-hour NAAQS for Ozone was revised on March 27, 2008[1] from 0.080 parts per million (ppm) over an 8-hour period to 0.075 ppm. The fourth highest value in a year, rounded to the nearest 0.01 and averaged over three years, may not exceed this level at any monitor in the area. The revised standard was effective May 27, 2008. However, nonattainment designations have not occurred based on the 2008 8-hour Ozone NAAQS and transportation conformity continues to be illustrated to the 1997 8-hour Ozone NAAQS.

On December 11, 2006 EPA published the final rule[2] redesignating Maine's two ozone nonattainment areas (Portland and Midcoast) to attainment and approving the maintenance plans for these areas. The effective date of the rule was January 10, 2007. Consequently, all areas of the state currently meet the NAAQS for all applicable pollutants. The Portland and Midcoast areas are now categorized as 8-hour ozone maintenance areas.

Figure 1 shows the boundaries of Maine's two 8-hour ozone maintenance areas and their relationship to the two metropolitan planning areas. The Portland 8-hour ozone maintenance area encompasses portions of four counties, and includes 55 municipalities. The Portland ozone area also encompasses the transportation planning jurisdictions of the KACTS and PACTS MPOs. The Midcoast 8-hour ozone maintenance encompasses portions of four counties and includes 54 municipalities. Table 1 describes each ozone maintenance area by county and municipality.

[2] Office of the Federal Register, *Federal Register: December 11, 2006 (Volume 71, Number 237)*, (Government Printing Office), 71489-71491.

Figure 1: Maine's Ozone Maintenance Areas

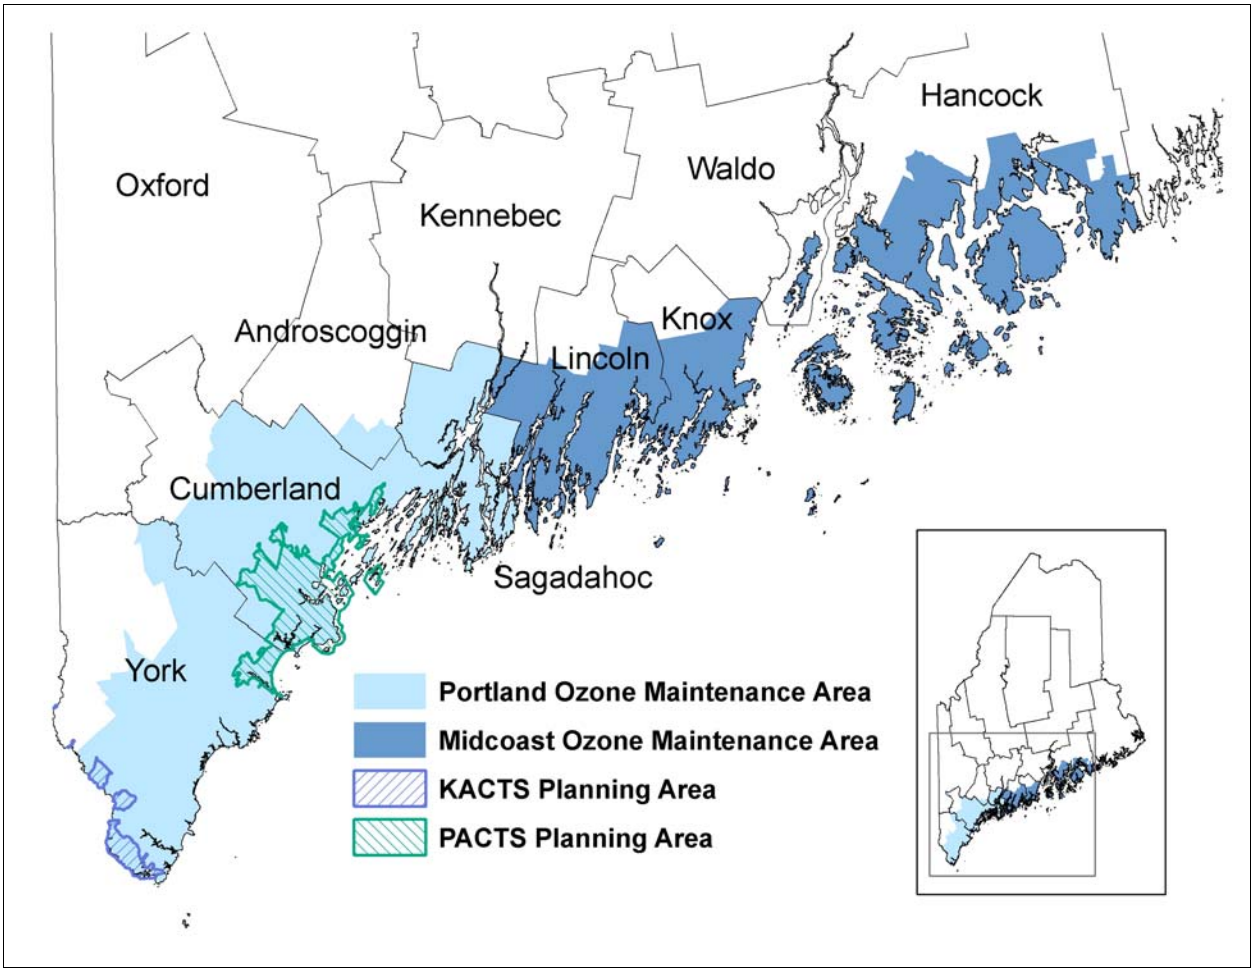

Table 1: Maine's Ozone Maintenance Areas by County and Municipality

Area	County	Towns
Portland	York	Alfred, Arundel, Berwick, Biddeford, Buxton, Dayton, Eliot, Hollis, Kennebunk, Kennebunkport, Kittery, Limington, Lyman, North Berwick, Ogunquit, Old Orchard Beach, Saco, Sanford, South Berwick, Wells, and York
Portland	Cumberland	Brunswick, Cape Elizabeth, Casco, Cumberland, Falmouth, Freeport, Frye Island, Gorham, Gray, Harpswell, Long Island, New Gloucester, North Yarmouth, Portland, Pownal, Raymond, Scarborough, South Portland, Standish, Westbrook, Windham, and Yarmouth
Portland	Androscoggin	Durham
Portland	Sagadahoc	Arrowsic, Bath, Bowdoin, Bowdoinham, Georgetown, Perkins Twp, Phippsburg, Richmond, Topsham, West Bath, and Woolwich.
Midcoast	Lincoln	Alna, Boothbay, Boothbay Harbor, Bremen, Bristol, Damariscotta, Dresden, Edgecomb, Monhegan Island Plt, Newcastle, Nobleboro, South Bristol, Southport, Waldoboro, Westport, and Wiscasset
Midcoast	Knox	Camden, Cushing, Criehaven Twp, Friendship, Isle Au Haut, Matinicus Isle Plt, Muscle Ridge Shoals Twp, North Haven, Owls Head, Rockland, Rockport, South Thomaston, St. George, Thomaston, Vinalhaven, and Warren
Midcoast	Waldo	Isleboro
Midcoast	Hancock	Bar Harbor, Blue Hill, Brooklin, Brooksville, Cranberry Isles, Deer Isle, Frenchboro, Gouldsboro, Hancock, Lamoine, Mt. Desert, Sedgwick, Sorrento, Southwest Harbor, Stonington, Sullivan, Surry, Swans Island, Tremont, Trenton, and Winter Harbor

Particulate Matter (PM_{10})

Maine had one nonattainment area for particulate matter (PM_{10}) that was redesignated to attainment effective October 30, 1995. This area is located in downtown Presque Isle, within a one-half mile radius of the Northeastland Hotel. Figure 1 shows the boundaries of Presque Isle PM_{10} maintenance area.

Subsequent analysis of the Presque Isle area by MaineDEP determined that the documented exceedences of the PM_{10} standard were attributable to road dust from local winter maintenance activities and not motor vehicle exhaust. The City of Presque Isle, MaineDEP, and MaineDOT entered a joint memorandum of understanding (MOU) that includes several measures to control dust emissions from paved roads in the downtown area.

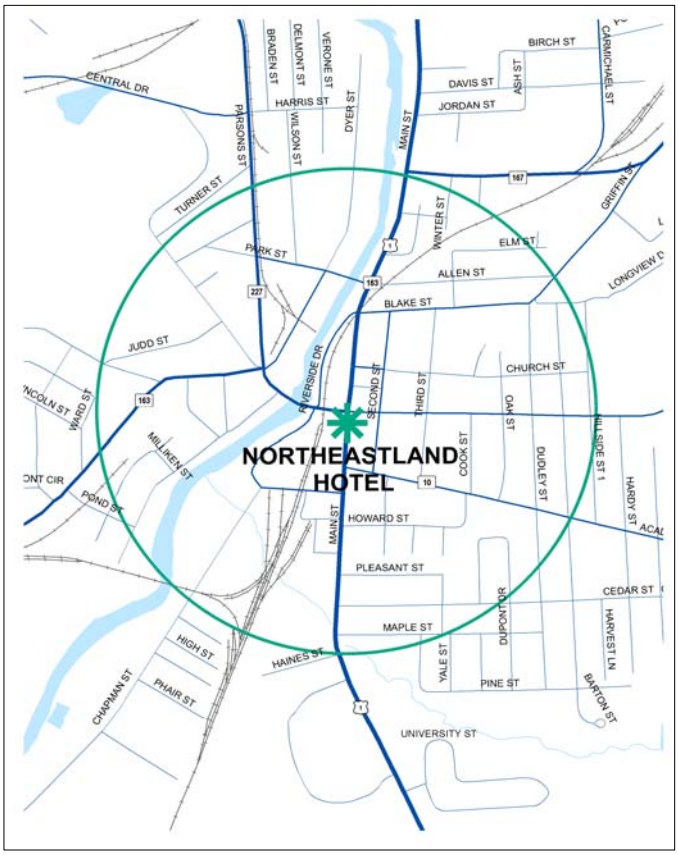

Figure 2: Presque Isle PM_{10} Maintenance Area

CONFORMITY REQUIREMENTS

Ground level ozone is produced by the reaction of several pollutants in the presence of sunlight. Volatile organic compounds (VOC) and nitrogen oxides (NOx) are the primary reactants. Thus, under the EPA conformity regulations, both VOC and NOx must be analyzed for regional transportation conformity in ozone nonattainment and maintenance areas.

Regional Emissions Analysis

The federal transportation conformity rule[3] specifies criteria and procedures for conformity determinations for transportation plans, programs, and projects and their respective amendments. The federal transportation conformity rule was first promulgated on November 24, 1993, by EPA, following the passage of amendments to the federal Clean Air Act in 1990. The federal transportation conformity rule has been amended several times since its initial release to reflect both EPA rule changes and court opinions.

The primary criteria for transportation conformity determinations include:

1. **Conformity Tests.** The plan or program must pass all the applicable conformity tests using motor vehicle emissions budgets (MVEB) or interim emissions approved by EPA for transportation conformity purposes (Sections 93.118 and 93.119).

[3] United States Environmental Protection Agency. 40 CFR Part 93. *Determining Conformity of Federal Actions to State or Federal Implementation Plans.* As amended on January 24, 2008.

2. **Latest Planning Assumptions and Emission Models.** The conformity determinations must be based upon the most recent planning assumptions and latest emission estimation models available (Sections 93.110 and 93.111).

3. **Timely Implementation of TCMs.** The plan or program must provide for the timely implementation of any transportation control measures (TCM) specifically identified in the State Implementation Plan (SIP) (Section 93.113). At this time no TCMs are specifically identified in Maine's SIP. Therefore, this condition is met and will not be addressed further.

4. **Interagency Consultation.** The conformity determinations must be made in accordance with the consultation procedures outlined in sections 93.105 and 93.112 of the federal conformity regulation and section 4 of Maine's transportation conformity regulation[4] .

Localized PM_{10} Hot-Spot Analysis

The transportation conformity rule specifies that Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) projects must not cause or contribute to any new localized PM_{10} violations or increase the frequency or severity of existing violations in PM_{10} nonattainment and maintenance areas. This criterion is satisfied under the following conditions:

1. If there are no FHWA/FTA projects, identified in the applicable transportation plan or program that significantly increase the number of diesel vehicles within the Presque Isle PM_{10} maintenance area.

2. If it is demonstrated, through quantitative hot-spot analysis, that any applicable projects will not cause or contribute to any new local violations or increase the frequency or severity of existing violations.

A letter from EPA dated February 7, 1994 removed the requirement for a regional emission analysis of this area. However, a conformity determination is required for any new transportation plans and transportation improvement programs based on the hot-spot criteria listed above.

APPLICABLE TRANSPORTATION PLANS AND PROGRAMS

As noted earlier, conformity determinations are required in nonattainment areas and maintenance areas for the adoption, acceptance, approval, or support of transportation plans and Transportation Improvement Programs (TIPs). The following section briefly describes the statewide and metropolitan transportation planning and programming process that is required for the allocation of federal funding sources. It should be noted that transportation planning is a continuing, comprehensive and collaborative process designed to encourage and promote the development of a multimodal transportation system to ensure safe and efficient movement of people and goods while balancing environmental and community needs. The extent of the transportation planning process is too large to be adequately addressed in this document. Therefore, the scope of this particular section is limited to the specific transportation activities requiring a conformity analysis. For more information on the transportation planning process please visit MaineDOT's website at http://www.maine.gov/mdot/transplanning.htm. Links to Maine's four MPOs, the agencies primarily responsible for transportation planning in the

[4] Maine Department of Environmental Protection. 06-096 CMR Chapter 139. *Transportation Conformity.* Effective September 19, 2007.

metropolitan planning areas, can also be found on MaineDOT's website at http://www.maine.gov/mdot/ppp/mpo.htm.

Transportation Plans

A transportation plan is a document resulting from regional or statewide collaboration and consensus on a region or state's transportation system, and serving as the defining vision for the region's or state's transportation systems and services. Transportation plans, often called long-range transportation plans, establish a framework of goals, objectives, policies, and investment strategies for addressing anticipated challenges and future trends. Each MPO is responsible for preparing a long-range transportation plan that encompasses their metropolitan planning area.

Connecting Maine is Maine's integrated, long-range, multimodal transportation plan for the next 20 years. It establishes a framework of goals, objectives, and performance-based strategies for addressing anticipated challenges and future trends. Connecting Maine also focuses on the link between Maine's transportation system and achieving a statewide vision of economic vitality, environmental stewardship, and quality of life.

MaineDOT developed Connecting Maine through a collaborative process involving Maine citizens, MaineDOT staff, leading economists and transportation experts from Maine and New England, and municipal and regional officials. Partners in this process included MPOs, Regional Councils, Economic Development Districts, the Maine Turnpike Authority, and other key stakeholders. A key element of this process was that each of Maine's Regional Councils produced a Regional Transportation Assessment (RTA) that identified Corridors of Regional and Economic Significance for Transportation (CREST), and also identified transportation opportunities to support regional land-use and economic development goals.

For conformity purposes, it is particularly important to note that *Connecting Maine* also incorporates the long-range transportation plans from Maine's four MPOs. Therefore, the conformity determination for *Connecting Maine* is applicable to the entire ozone maintenance area, including the KACTS and PACTS MPO areas.

This report documents the air quality conformity determination for the following long-range transportation plan:

- *Connecting Maine,* Maine's 2035 Long-Range Transportation Plan

Transportation Improvement Programs

A TIP is a staged, multiyear, intermodal program of transportation projects which is consistent with the metropolitan transportation plan or statewide transportation plan. The TIP includes a prioritized listing of transportation projects to be carried out during the specified federal fiscal year time frame. Each MPO is responsible for preparing a TIP for the applicable metropolitan planning area. MaineDOT is responsible for preparing a STIP that includes all projects with federal financial commitments for the specified federal fiscal year time frame. The STIP includes all projects listed in the MPO's TIPs.
The 2012-2015 STIP constitutes MaineDOT's plan for obligating federal funds provided by FHWA and FTA for federal fiscal years 2012-2015, beginning October 1, 2011. The STIP also incorporates the TIPs, and associated projects, from Maine's four MPOs. Therefore, the conformity determination for 2012-2015 STIP is applicable to the entire ozone maintenance area, including the KACTS and PACTS MPO areas.

This report documents the air quality conformity determination for the following STIP and TIPs:

- 2012-2015 Statewide Transportation Improvement Program
- 2012-2015 PACTS Transportation Improvement Program
- 2012-2015 KACTS Transportation Improvement Program

INTERAGENCY CONSULTATION

Transportation conformity is a collaborative process among federal, state, and local agencies. Every three months, MaineDOT convenes an interagency consultation committee meeting with representatives from the following agencies:

- MaineDOT
- MaineDEP
- Maine Turnpike Authority (MTA)
- PACTS
- KACTS
- Androscoggin Transportation Resource Center (ATRC)
- Greater Portland Council of Governments (GPCOG)
- Southern Maine Regional Planning Commission (SMRPC)
- FHWA
- FTA
- EPA

The meetings are generally well attended by all parties and are held at the GPCOG offices in Portland or by teleconference. The consultation meetings have been held regularly since 1992. The general purposes of the interagency consultation meetings are to:

- Provide a forum for discussion and decision making regarding all areas of transportation conformity including, but not limited to, the development of the SIP, MVEBs, transportation plans, STIPS/TIPs and associated conformity documents
- Evaluate events that will trigger new conformity determinations
- Determine latest planning assumptions and emission models
- Identify projects requiring a regional emissions or hot-spot analysis
- Develop a format for presenting the transportation conformity determination
- Establish a public participation process for the conformity determination

The conformity analysis is prepared by MaineDOT with assistance from MaineDEP under the guidance of the interagency consultation committee. The decisions made by the consultation committee serve as the basis for the conformity analysis and the ultimate conformity

determination. The conformity analysis and the applicable transportation plans and programs are made available for public review and comment.

The specific purposes of the interagency consultation meetings and the roles and responsibilities for the agencies (MaineDEP, MaineDOT, PACTS, and KACTS) responsible for performing the conformity analysis are established in Section 4 of Maine's transportation conformity regulation[5]. As part of the SIP, the interagency consultation procedures contained in Maine's transportation conformity regulation are federally enforceable.

METHODOLOGY

The conformity process is complex, not in concept, but in detail. Simply stated, emission estimates from highway-related mobile sources in the Portland and Midcoast areas are developed by multiplying vehicle miles traveled (VMT) by composite emission factors generated by EPA's Mobile 6.2 model. The conformity process involves a number of key assumptions and socioeconomic inputs developed by MaineDOT, MaineDEP and the MPOs and reviewed by the interagency consultation committee. Figure 3, on page 8, summarizes the conformity process and highlights the key activities including, interagency consultation, travel demand modeling, emissions modeling, public review, and the final conformity determination. The analysis presented in this document was prepared by MaineDOT with technical assistance from MaineDEP and PACTS.

Interagency Consultation

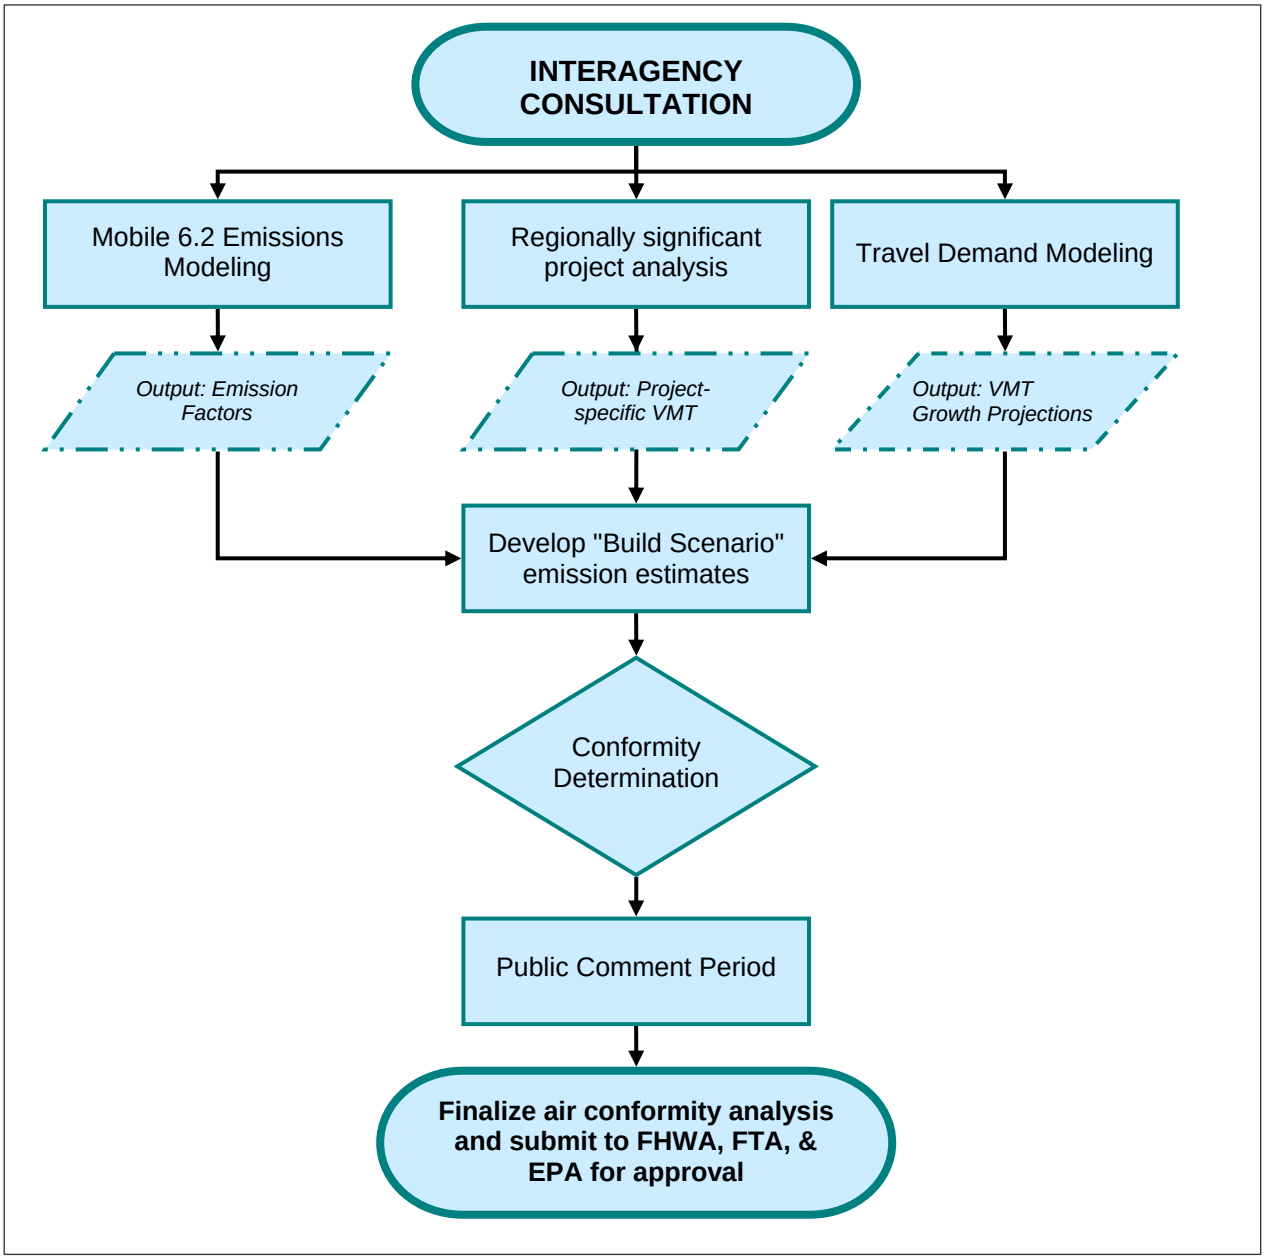
As illustrated in Figure 3, interagency consultation is the initial step in the transportation conformity process. The interagency consultation committee serves both a technical and regulatory reference and a decision-making body regarding key planning assumptions and other factors. Specifically, the committee identifies regionally-significant projects, determines the appropriate conformity tests and analysis years, evaluates projects for their VMT reduction (or creation) potential, and makes other key decisions when necessary. The interagency consultation committee is described in further detail in the previous section.

Travel Demand Modeling

The transportation conformity rule stipulates that the conformity determination must be based on the most current planning assumptions and models. Thus, a critical element of the conformity analysis is the traffic demand estimate. Both MaineDOT and PACTS have developed travel demand models. These models use socioeconomic and transportation network data to estimate travel demand. In both cases, population and employment data are forecasted using a REMI[6] (Regional Economic Models, Inc.) model. Data from both the statewide (MaineDOT) and PACTS model are combined to provide estimates of VMT growth for the maintenance areas. The PACTS model provides growth estimates for all municipalities or portions of municipalities within the Portland Metropolitan Planning Area. The Statewide model provides the growth estimates for all other municipalities in Portland and Midcoast areas.

[5] Ibid.
[6] A REMI model predicts, for each year in the future, the number and distribution of employment in a given region for a number of industry and occupational categories. The model also predicts other variables such as personal income, population, wage rates, output and value added at a detailed level.

Figure 3: Conformity Process Flow



Statewide Travel Demand Model

The statewide model relies on population demographics, employment, and economic activity in order to forecast VMT. A REMI model is used to establish base year and forecast year population and employment for nine regions in Maine. The travel demand model, based on the TRIPS modeling software, provides a standard forecast of statewide traffic growth that can be used to evaluate capital improvement projects, test transportation alternatives, and forecast VMT. The statewide model is specifically programmed to address recreational travel patterns that lead to peak traffic and congestion during the summer tourist season. During the development of the model, MaineDOT reviewed population increases in states that provide the largest number of visitors to Maine (Massachusetts, Connecticut, Rhode Island, New York, and

New Jersey) and projected growth in service employment in order generate an estimate of recreational and seasonal trips.

PACTS Travel Demand Model

The PACTS Model has four inputs: population, households, employment and the transportation network (roadways and transit routes). The Model operates in three modules – briefly described below. Each of the modules contains a number of adjustable parameters. Adjustment of the parameters provides the necessary flexibility to make changes to the model to reflect actual conditions in the model area.

- Trip generation – determines how many trips will be made. Trips are produced based on the number and size of households and number of automobiles. Trips are attracted by places of employment with the number of trips varying depending on the type of employment. The number of trips produced must balance with the number of trips attracted.
- Trip distribution – determines where the trips will go and how the trips will be divided amongst the TAZ. (The PACTS Model has 720 internal TAZ or traffic analysis zones.)
- Trip assignment – assigns the trips to specific routes through 20 all-or-nothings iterations. Each iteration adds 5% of the total assignment to the network. The all-or-nothing method directs traffic to the path of least resistance when considering origin/destination, distance, free-flow speeds and tolls. VMT is then calculated by adding up the collective distances traveled by all of the trips assigned.

To determine the VMT impacts of a project the process described above is done twice. The first time the process is done on the base model (i.e., without the project) and the second time on the base model with the project added. The difference between the two processes is the predicted change in VMT as a result of the project.

VMT Estimates

Once the results of the travel demand modeling are finalized, the annual growth rates are then applied to a base year[7] of vehicle-miles traveled (VMT) to estimate traffic levels for the analysis years. Therefore, the final output of the travel demand modeling process is an estimation of average summer day VMT for the entire state, including Maine's two ozone maintenance areas. The annual rates of VMT growth, as produced by the PACTS and statewide travel demand models, are shown in Appendix C. Tables of estimated VMT used in this analysis are included in Appendices C and G.

Mobile 6.2 Emissions Modeling

Mobile 6.2 is a model developed by EPA that calculates emissions of Hydrocarbons (HC), Carbon Monoxide (CO), Nitrogen Oxides (NOx), Carbon Dioxide (CO2), Particulate Matter (PM), and toxics from cars, trucks, and motorcycles for specified vehicle fleet, fuel, temperature, and speed conditions.

As part of a cooperative agreement with MaineDOT, MaineDEP performed the MOBILE6.2 model analysis and conformity calculations. EPA Region 1 provided guidance on the setup and use of the MOBILE6.2 emissions model and reviewed the MOBILE6.2 input files that were used

[7] The base year VMT for this conformity determination is 2009. VMT estimates for all highways in the State were generated using actual traffic counts taken during the 2009 calendar year.

for developing the emission factors for the regional emissions analysis. The input files can be found in Appendix F, and the emissions factors can be found in Appendices H and I.

As noted above, Mobile 6.2 generates emission factors for certain pollutants based on a number of input factors including environmental conditions, vehicle fleet mix, emission controls, and fuel parameters. The following list provides a brief summary of several assumptions used in the regional emissions analysis for ozone precursors (VOC and NOx):

Anti-Tampering Program (ATP) & Inspection and Maintenance (I/M)

The ATP modeled in the conformity analysis includes statewide annual inspections for catalytic converters for all light-duty gas vehicles and trucks (1983 models and newer). The model runs also include ATP annual gas cap inspections and I/M On-Board Diagnostic (OBD) and gas cap pressure testing for all light-duty gas vehicles and trucks (1996 models and newer) in Cumberland County only[8].

Fuel Parameters

The fuel parameters specified in the emissions modeling include conventional gasoline (no RFG, national default value) with a summertime (May 1st through September 15) Reid vapor pressure (RVP) of 9.0 psi in Hancock and Waldo counties and a RVP of 7.8 psi in York, Cumberland, Androscoggin, Sagadahoc, Lincoln and Knox counties[9].

Maine LEV (Low Emission Vehicles)

All new vehicles sold in the U.S. are subject to emission standards set by either the federal government or the State of California. California is the only state with the authority to set its own vehicle standards; other states may adopt either the California or the federal standards. Maine has adopted California's LEV I and LEV II standards[10]. However, unlike California LEV, Maine LEV does not contain a provision for the denial of motor vehicle registrations for new vehicles that are not LEV certified. Thus, EPA determined that Maine may only take 90% credit for the Maine LEV program in transportation conformity analyses.

Stage II Refueling

As of January 1, 2012, Stage II ("at-the-pump") vapor recovery systems for gas stations in York, Cumberland, and Sagadahoc counties is no longer required in Maine[11]; therefore, Stage II was not included in the model runs for 2012 and beyond.

Build Scenario Emissions

MaineDOT and MaineDEP work together to bring together estimates of VMT at various speed ranges by the emission factors for those speeds as generated by EPA's Mobile 6.2 model. Output from the travel demand modeling process (build scenario VMT) is multiplied by the outputs from Mobile 6.2 emissions modeling process (area specific emission factors) to generate build scenario emissions for each maintenance area. The build scenario emissions are forecasts of highway-related motor vehicle emissions based several socioeconomic inputs and

[8] MRSA 29-A §1751. *Motor vehicle inspection.* As amended 2001.
[9] Maine Department of Environmental Protection. 06-096 CMR Chapter 119. *Motor Vehicle Fuel Volatility Limit.* As amended June 1, 2000.
[10] Maine Department of Environmental Protection. 06-096 CMR Chapter 127. *New Motor Vehicle Emission Standards.* As amended December 19, 2005.
[11] MRSA 38 § 585-E. *Gasoline station vapor recovery requirements.* As amended 2007.

a comprehensive transportation network that includes all regionally significant transportation projects identified in the STIP and LRP.

Conformity Determination

The conformity determination for ozone is completed by comparing VOC and NOx build scenario emission estimates for analysis years against the applicable conformity tests. In order for the plan or TIP/STIP to pass conformity for ozone the build scenario emissions must be less than or equal to the required tests given in Table 2. The next section describes the required tests (MVEBs and baseline emissions) in further detail.

The plan or STIP must also pass conformity for PM_{10}. As noted earlier, the conformity requirements for PM_{10} are satisfied if the plan or STIP does not contain projects that significantly increase the number of diesel vehicles within the Presque Isle PM_{10} maintenance area or if any new projects are not expected to cause or contribute to any new local violations or increase the frequency or severity of existing violations.

The final conformity determination and associated air quality analysis is reviewed by the interagency consultation committee prior to public release and federal approval.

Public Comment

Air quality conformity analysis for LRPs require a 45 day comment period and conformity analysis for TIPs and STIPs require a 30 day comment period. Hard copies of all documents are made available at all MPOs, MaineDOT Regional Offices and federal depository libraries across the state. Comments are accepted for at least 30 days after notification for the TIP/STIP conformity analysis and up to 45 days after notification for the LRP conformity analysis. The conformity analysis is also available on the web at http://www.maine.gov/mdot/aqn/index.htm.

CONFORMITY TESTS

The MaineDEP is responsible for the development of the entire SIP. The MaineDEP identifies how pollution from all sources will be reduced sufficiently to meet the federal air quality standards in the Portland and Midcoast areas. As part of this process, MVEBs are developed by MaineDEP and approved by EPA. The MVEBs are the total allowable emissions from all highway-mobile sources within an area for a certain date. Maine currently has MVEBs for VOC and NOx in each ozone maintenance area. The MaineDEP consults with MaineDOT and the interagency consultation committee during the development of the SIP and MVEBs.

EPA's conformity rule requires that emissions in the "Build" scenario must be less than or equal to the MVEBs for the last year of the maintenance plan. The last year of Maine's maintenance plan for the Portland and Midcoast areas is 2016. The 2016 MVEBs are listed below. For any analysis years before 2016, emissions must be less than or equal to the MVEBs established for the most recent prior year. In areas without MVEBs, emissions must be less than or equal to 2002 baseline emissions. For example: Portland area build emissions in 2025 must be equal to or less than the 2016 MEVBs and build emissions for 2012 must be equal to or less than the 2007 MVEBs. The applicable conformity tests are shown in Table 2.

Table 2: 8-Hour Ozone Conformity Tests

Area	Required Tests	Emissions Budget			
		VOC		NOx	
		kg/day	tons/day	kg/day	tons/day
Portland	Build Emissions < or = 2007 MVEBs[12]	18,253.15	20.115	36,200.54	39.893
	Build Emissions < or = 2016 MVEBs[13]	15,117.06	16.659	29,797.64	32.837
Midcoast	Build Emissions < or = 2002 Baseline Emissions[14]	6,185.12	6.816	10,269.51	11.317
	Build Emissions < or = 2016 MVEBs	3,414.70	3.763	5,666.97	6.245

In order for the plan or program to conform to the SIP, the analysis must pass the applicable tests for each analysis year. The analysis years for the Portland and Midcoast areas are 2012, 2016, 2025, 2030, and 2035.

[12] 2007 MVEBs were found adequate by EPA on August 30, 2005 and became effective September 14, 2005. Office of the Federal Register, *Federal Register: August 30, 2005 (Volume 70, Number 167)*, (Government Printing Office), 51352-51353.
[13] 2016 MVEBs were approved by EPA on December 11, 2006 and became effective January 10, 2007. See footnote 1 for citation.
[14] 2002 is the base year for both of the Portland and Midcoast maintenance plans.

ANALYSIS RESULTS

The following tables summarize the project analysis for all regionally significant transportation projects in the Portland and Midcoast areas. The complete project analyses are located in Appendix A. A positive number indicates a reduction in emissions attributable to the project and a negative number indicates an emissions increase. All projects denoted "VMT FORECAST" were accounted for by the regional travel demand modeling. The VMT changes associated with these projects are captured in the overall VMT estimates for the maintenance area in Appendix C. The resulting increase or decrease in emissions from all regionally significant projects in the 2012-2015 STIP, the 2012-2015 PACTS and KACTS TIPs, and *Connecting Maine* is, therefore, reflected in the conformity tests in Tables 5 and 6.

	VOC	NOx	VOC	NOx	VOC	NOx	VOC	NOx	VOC	NOx
17163	1.884	-1.188	3.777	1.825	4.093	3.745	4.888	5.196	7.133	7.160
Total	**1.884**	**-2.131**	**3.777**	**1.825**	**4.093**	**3.745**	**4.888**	**5.196**	**7.133**	**7.014**

CONFORMITY DETERMINATION

A regional emissions analysis for VOC and NOx was conducted for the both Portland and Midcoast 8-hour Ozone Maintenance Areas. The analysis was conducted using the latest planning assumptions and emission models under the guidance of the interagency consultation committee. The results of the analysis in Tables 5 and 6 demonstrate that VOC and NOx emissions for the Portland and Midcoast areas for each of the "build" scenarios are less than the applicable MVEBs and baseline emissions.

Table 5: Portland Area Conformity Tests

Portland Area Conformity Tests (tons per summer day)										
Test	2012		2016		2025		2030		2035	
	VOC	NOx	VOC	NOx	VOC	NOx	VOC	NOx	VOC	NOx
Build	11.044	19.298	8.704	12.447	5.946	6.429	5.849	5.365	5.945	5.151
Budget	20.115	39.893	16.659	32.837	16.659	32.837	16.659	32.837	16.659	32.837
Result	PASS	PASS	PASS	PASS	PASS	PASS	PASS	PASS	PASS	PASS

Table 6: Midcoast Area Conformity Tests

Midcoast Area Conformity Tests (tons per summer day)										
Test	2012		2016		2025		2030		2035	
	VOC	NOx	VOC	NOx	VOC	NOx	VOC	NOx	VOC	NOx
Build	2.442	3.767	1.966	2.547	1.405	1.481	1.377	1.288	1.374	1.286
Budget	6.816	11.317	3.763	6.245	3.763	6.245	3.763	6.245	3.763	6.245
Result	PASS	PASS	PASS	PASS	PASS	PASS	PASS	PASS	PASS	PASS

Conclusion

The following pages demonstrate that all the required conformity tests were satisfied in the Portland and Midcoast maintenance areas for each analysis year. The regional emissions analysis demonstrates that the transportation-related emissions of VOC and NOx are less than the established budgets for each analysis year under the build scenarios for both 8-hour Ozone Maintenance Areas. Since a PM_{10} hot-spot determination is not required, the conditions for the Presque Isle PM_{10} maintenance area have also been satisfied. Therefore, the 2012-2015 STIP, the 2012-2015 PACTS and KACTS TIPs, and *Connecting Maine* conform to the current SIP and satisfy the conformity requirements of the Clean Air Act Amendments of 1990.

PIN 11086.00, Yarmouth - I-295 Exit 15 Improvements and Park & Ride Lot

Summary:

PIN 11086.00 includes the realignment of the southbound on ramp at Exit 15 on I-295 in Yarmouth and the construction of a new northbound on ramp and a park and ride lot. The existing and future VMT associated with the ramp improvements are accounted for in the PACTS Travel Demand Model. The air quality analysis for the park and ride lot is included on page A-5 under PIN 17490.00.

PIN 11231.00 and 12800.00, South Portland - I-295 Southbound and northbound auxiliary lanes

Summary:

PINs 11231 and 12800 include the construction of a southbound and northbound auxiliary lane between Exit 3 and Exit 4 on I-295 in South Portland (opened in 2010). The existing and future VMT associated with this project are accounted for in the PACTS Travel Demand Model.

PIN 15106.00, Portland- South Portland - Veteran's Bridge Replacement

Summary:

PIN 15105 includes the replacement of the Veteran's Memorial Bridge and intersection reconfigurations. The existing and future VMT associated with this project are accounted for in the PACTS Travel Demand Model.

PIN 15633.00, Falmouth - Falmouth Spur On ramp

Summary:

PIN 15633.00 includes the lengthening of the acceleration lane on I-295 northbound at the Falmouth Spur on-ramp. The existing and future VMT associated with this project are accounted for in the PACTS Travel Demand Model.

PIN 15634.00, Portland - I-295 Exits 7 & 8 Improvements

Summary:

PIN 15634.00 includes the construction of a southbound auxiliary lane between Exit 7 and Exit 8 on I-295 in Portland and the construction of additional lanes to both the northbound and southbound the Exit 7 off ramps. The project also includes the installation of a traffic signal at the intersection of the Exit 7 off ramps and coordination with the existing signal at the intersection of Franklin Street Arterial and Marginal Way. The existing and future VMT associated with this project are accounted for in the PACTS Travel Demand Model.

PIN 17343.00 Scarborough - Intersection improvements at Dunstan Corner

Summary:

PIN 17343.00 includes intersection improvements at U.S. Route 1, Payne Road, Pine Point Road, and Broad Turn Road, known locally as Dunstan Corner. The existing and future VMT associated with this project are accounted for in the PACTS Travel Demand Model.

PIN 17628.00 Portland - Somerset Street Extension

Summary:

PIN 17628.00 includes the extension of Somerset Street from Elm Street to Forest Avenue. The existing and future VMT associated with this project are accounted for in the PACTS Travel Demand Model.

Freeport School Street Extension

Summary:

This local project includes the extension of School Street to Bow Street in Freeport to support mixed-use development. The existing and future VMT associated with this project are accounted for in the PACTS Travel Demand Model.

PIN 17163.00, Trenton - Acadia Gateway Center (AGC) Project Analysis

Summary:

PIN 17163.00 includes the construction of the Acadia Gateway Center - a welcome center, public transportation center, and bus maintenance facility serving the Mount Desert Island/Acadia National Park Area. The center will support the Island Explorer bus service and accommodate a small shuttle service to the Island's largest employer - the Jackson Laboratory. The project is expected to increase the ridership of the Island Explorer bus service and reduce congestion on Mount Desert Island.

Table A-2: PIN 17163.00 Project Analysis

Year	VMT Created (Propane Buses)			VMT Reduced/Day (personal vehicles)		Emissions Projections					
	Island Explorer Trips/Day	Jackson Laboratory Shuttle Trips/Day	Bus Miles Traveled/Day[1, 2]	Island Explorer[3,4,5,6]	Jackson Laboratory Riders	LPG Bus Emission Factors[7] (grams/mile)		Personal Vehicles Emission Factors[8] (grams/mile)		Emissions (kg/day)	
						VOC	NOx	VOC	NOx	**VOC**	**NOx**
2012	73	8	2294	10964	1092	2.597	3.909	0.679	0.567	**2.228**	**-2.131**
2016	75	8	2354	12711	1092	1.503	1.688	0.530	0.420	**3.777**	**1.825**
2025	79	8	2474	16585	1092	0.939	0.666	0.363	0.305	**4.093**	**3.745**
2030	81	8	2534	19226	1092	0.885	0.211	0.351	0.282	**4.888**	**5.196**
2035	83	8	2594	26003	1093	0.868	0.211	0.348	0.279	**7.178**	**7.014**

Notes

[1] Assumes Island Explorer buses travel an average 30 miles round trip from the Acadia Welcome Center to various stops on Mount Desert Island (MDI) and back.

[2] Assumes the Jackson Laboratory shuttles travel 13 miles per one-way trip.

[3] Assume 3% growth rate in ridership for the Island Explorer.

[4] Annual AGC visitors estimated based on the number of existing visitors to the Thompson Island Visitors Center.

[5] Assumes, on average, 1 in 4 people visiting the AGC will ride the Island Explorer buses.

[6] Assumes an average of 2.09 tourists/vehicle based on the 2001 Federal Highway Administration (FHWA), National Household Travel Survey (NHTS) average vehicle occupancy rate of 2.09 for Social/Recreational trips.

[7] Emission Factors for Propane Buses were generated by applying multiplicative factors, developed by Delucci, M., et al, to speed-specific Mobile 6.2 emission factors for Heavy Duty Gasoline Buses (HDGB). Delucci, M., et al, University of California, Davis, Institute of Transportation Studies, *Emissions of Criteria Pollutants, Toxic Air Pollutants, and Greenhouse Gases, from the Use of Alternative Transportation Modes and Fuels*, Davis, CA, January 1996, rev. 2002.

[8] Assumes an average speed of 43 MPH (Rural Minor Arterial) for commuter and tourist vehicles which include gasoline- and diesel-powered passenger cars, SUVs, and pickup trucks (LDGV, LDGT1, LDGT2, LDGT3, LDGT4, LDDV, LDDT12, and LDDT34).

PIN 17460, Brunswick - Greenwheels Explorer Project Analysis

Summary:

PIN 17460.00 includes operating and start-up assistance for the Greenwheels Explorer in Brunswick. The new service will feature 3 hybrid gasoline buses providing continuous service 5 days a week from one end of Brunswick to the other (Thornton Oaks and Parkview Hospital to Mid Coast Hospital).

Table A-3: PIN 17460.00 Brunswick Shuttle Project Analysis

Year	VMT Created (Hybrid Gasoline Buses)			VMT Reduced/Day (personal vehicles)		Emissions Projections					
	Round Trips/Day[1]	Milles per Trip	Bus Miles Traveled/Day	Daily Ridership[2]	VMT/Day[3]	HDGB Emission Factors (grams/mile)		Personal Vehicles Emission Factors[4] (grams/mile)		Emissions (kg/day)	
						VOC	NOx	VOC	NOx	**VOC**	**NOx**
2012	9	20	180	107	1313	3.206	6.222	0.584	0.448	**0.252**	**-0.484**
2016	9	20	180	131	1607	1.829	3.002	0.428	0.285	**0.415**	**-0.045**
2025	9	20	180	183	2245	1.115	1.166	0.253	0.156	**0.414**	**0.169**
2030	9	20	180	212	2601	1.011	0.375	0.243	0.133	**0.502**	**0.307**
2035	9	20	180	240	2945	0.992	0.274	0.241	0.131	**0.589**	**0.368**

Notes

[1] Brunswick Shuttle will operate 5 days per week (250 days per year).

[2] Ridership projections from *"Wheels": A Model for Community Transportation in the Greater Brunswick Area* prepared by The Midcoast Collaborative for Access to Transportation, April 25, 2007.

[3] Assumes an average of 1.63 riders/vehicle based on the 2001 Federal Highway Administration (FHWA), National Household Travel Survey (NHTS)

[4] Assumes an average speed of 26 MPH (Urban Minor Arterial) for personal vehicles which include gasoline- and diesel-powered passenger cars, SUVs, and pickup trucks (LDGV, LDGT1, LDGT2, LDGT3, LDGT4, LDDV, LDDT12, and LDDT34).

PIN 17490.00, Yarmouth - Park and Ride Lot Project Analysis

Summary:

PIN 17490.00 includes the construction of a park and ride adjacent to Exit 15

Table A-4: PIN 17490.00 Project Analysis

Year	VMT Reduced (personal vehicles)		Emissions Projections			
	Reduced Trips/Day[1,2]	Vehicle Miles Traveled/Day[3]	Personal Vehicles Emission Factors[4] (grams/mile)		Emissions (kg/day)	
			VOC	NOx	**VOC**	**NOx**
2012	0	0	0.504	0.468	**0**	**0**
2016	150	4500	0.370	0.298	**1.665**	**1.341**
2025	150	4500	0.211	0.163	**0.950**	**0.734**
2030	150	4500	0.201	0.140	**0.905**	**0.630**
2035	150	4500	0.200	0.137	**0.900**	**0.617**

Notes

[1] Assumes new lot will be 50% occupied (250 out of 500 spaces) by 2016.

[2] Assumes all users will travel within the Portland Maintenance Area.

[3] Assumes an average round-trip length of 30 miles.

[4] Assumes an average speed of 59 MPH (Urban Interstate) for personal vehicles which include gasoline- and diesel-powered passenger cars, SUVs, and pickup trucks (LDGV, LDGT1, LDGT2, LDGT3, LDGT4, LDDV, LDDT12, and LDDT34).

Portland to Brunswick - Downeaster Extension Project Analysis

Summary:

This analysis examines the air quality impacts of the proposed extension of Downeaster Passenger Rail service to Brunswick.

Table A-5: Downeaster Extension Project Analysis

Year	VMT Reduced (passenger vehicles)				Emission Projections (passenger vehicles)				
	Train Passengers per Day[1]	Vehicle Trips/Day Reduced[2]	Brunswick, ME to NH Mileage	VMT/Day Removed	Avg. Speed	Emission Factors[3]		Emissions (kg/day)	
						VOC	NOx	**VOC**	**NOx**
2012	0	0	76	0	61	0.501	0.473	**0.000**	**0.000**
2016	116	71	76	5,409	61	0.368	0.301	**1.990**	**1.628**
2025	180	110	76	8,393	61	0.211	0.165	**1.771**	**1.385**
2030	229	140	76	10,677	61	0.200	0.142	**2.135**	**1.516**
2035	293	180	76	13,661	61	0.198	0.139	**2.705**	**1.899**

Assumptions

[1] 100 passengers per day for the 1st year of operation increasing by 5% per year (from *Downeaster Portland North Expansion, Railroad Rehabilitation and Financing Program Application*, May 20, 2008

[2] Assumes an average of 1.63 riders/vehicle based on the 2001 Federal Highway Administration (FHWA), National Household Travel Survey (NHTS)

[3] Assumes an average speed of 67 MPH (Rural Interstate) for personal vehicles which include gasoline- and diesel-powered passenger cars, SUVs, and pickup trucks (LDGV, LDGT1, LDGT2, LDGT3, LDGT4, LDDV, LDDT12, and LDDT34)

PIN 19107.00, Arundel - Route 111 Westbound Passing Lane

Summary:

PIN 19107.00 includes the construction of a half-mile passing lane on Route 111 Westbound in Arundel. The project is not expected to influence VMT; however, the project is expected to increase average speeds along a stretch of Route 111 from Biddeford to Lyman[1].

Table A-6: PIN 19107.00 Project Analysis

Year	VMT (Route 111)	Emissions Projections[2]							
		Emission Factors (grams/mile)			Emission Factors (grams/mile)			Emissions (kg/day)	
		Avg. Speed	VOC	NOx	Avg. Speed	VOC	NOx	**VOC**	**NOx**
2012	0	43	0	0	44	0	0	**0**	**0**
2016	36556	43	0.480	0.651	44	0.478	0.655	**0.055**	**-0.146**
2025	38255	43	0.335	0.361	44	0.333	0.363	**0.069**	**-0.061**
2030	39198	43	0.323	0.309	44	0.321	0.310	**0.074**	**-0.059**
2035	40142	43	0.320	0.295	44	0.319	0.296	**0.040**	**-0.056**

Notes

[1] Analysis area stretches from Andrews Road in Biddeford to Route 35 in Lyman

[2] The project will result in a 1 MPH change in average speed over 4.4 mile segment of Route 111 (Other Principal Arterial)

PIN 19475.00, Topsham - Park and Ride Lot Project Analysis

Summary:

PIN 19475.00 includes the construction of a park and ride in Topsham to compliment the existing facility (27 spaces) located at the Topsham Fair Mall.

Table A-7: PIN 19475.00 Project Analysis

Year	VMT Reduced (personal vehicles)		Emissions Projections			
	Reduced Trips/Day[1,2]	Vehicle Miles Traveled/Day[3]	Personal Vehicles Emission Factors[4] (grams/mile)		Emissions (kg/day)	
			VOC	NOx	**VOC**	**NOx**
2012	0	0	0.0	0.0	**0**	**0**
2016	45	2475	0.463	0.447	**1.146**	**1.106**
2025	45	2475	0.316	0.325	**0.782**	**0.804**
2030	45	2475	0.304	0.302	**0.752**	**0.747**
2035	45	2475	0.302	0.299	**0.747**	**0.740**

Notes

[1] Assumes new lot will be 75% occupied 45 out of 60 spaces) by 2016.

[2] Assumes all users will travel within the Portland Maintenance Area.

[3] Assumes an average round-trip length of 55 miles.

[4] Assumes an average speed of 69 MPH (Rural Interstate) for personal vehicles which include gasoline- and diesel-powered passenger cars, SUVs, and pickup trucks (LDGV, LDGT1, LDGT2, LDGT3, LDGT4, LDDV, LDDT12, and LDDT34)

END OF RUN         :
```

```
* Run for 12-15 STIP Conformity Analysis
* Cumberland County - Analysis Years: 2012, 2016, 2025, 2030, and 2035
*
* Assuming complete phase-out of Stage II program
*
* With ATP catalyst removal and gas cap; and gas cap pressure I/M and Cumberland
County OBD
* National LEV start 1999,  Tier 2 start 2004.
*
* This run is without Maine LEV II.  Users must also do a separate run with
* Maine LEV II and take 90% credit.

END OF RUN         :
```

```
* Run for 12-15 STIP Conformity Analysis
* Cumberland County - Analysis Years: 2012, 2016, 2025, 2030, and 2035
*
* Assuming complete phase-out of Stage II program
*
* With ATP catalyst removal and gas cap; and gas cap pressure I/M and Cumberland
County OBD
* National LEV start 1999,  Tier 2 start 2004.
*
* This run is with Maine LEV II.  Users must also do a separate run without
* Maine LEV II and take 90% credit.

END OF RUN         :
```

```
* Run for 12-15 STIP Conformity Analysis
* York County - Analysis Years: 2012, 2016, 2025, 2030, and 2035
*
*
* Run for years after phase-out of Stage II refueling
*
* With ATP catalyst removal; no I/M
* National LEV start 1999,  Tier 2 start 2004.
*
* This run is with Maine LEV II.  Users must also do a separate run without
* Maine LEV II and take 90% credit.

	24	14				0.400				
	23	16						0.406		

Commuter Vehicle Class Emission Factors are a composite of the following MOBILE6.2 Vehicle Classes: LDGV, LDGT1, LDGT2, LDGT3, LDGT4, LDDV, LDDT12 and LDDT34.

HPMS Federal Functional Class Codes:
Rural: 1=Interstate; 2=Other Principal Arterial; 6=Minor Arterial; 7=Major Collector; 8=Minor Collector; 9=Local
Urban: 11=Interstate; 12=Other Freeways ₋Expressways, 14=Other Principal Arterial; 16=Minor Arterial; 17=Collector; 19=Local

Classes 1, 2, 11 and 12 are run using the FREEWAY roadway scenario. All other classes are run using the ARTERIAL roadway scenario.

Mr. David A. Bernhardt, Commissioner
Maine Department of Transportation
16 State House Station
Augusta, Maine 04330-0016

Subject: Maine FY 2012 - 2015 Statewide Transportation Improvement Program (STIP)

Dear Commissioner Bernhardt:

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have completed our review of the final FY 2012-2015 STIP transmitted on September 19, 2011. We have also reviewed the Metropolitan Planning Organizations (MPO) Transportation Improvement Programs (TIPs), with subsequent revisions. Based upon information provided by MaineDOT and the MPOs, we concur that the STIP/TIPs are fiscally constrained and that they are consistent with their Long Range Plans.

In accordance with the 1990 Clean Air Act Amendments (CAAA) and 23 CFR 450, a conformity determination must be completed as a joint action by FHWA and FTA. Based on our evaluation of the material submitted and coordination with the U.S. Environmental Protection Agency (enclosed letter dated September 21, 2011), we have determined that the STIP and TIPs demonstrate conformity with the 1990 CAAA and 40 CFR Part 51. We also concur that the analysis demonstrates conformity with the State Implementation Plan in all of Maine's designated maintenance areas according to the methods prescribed by the current Federal guidance.

Therefore, in accordance with 23 CFR 450.220, and based upon the MaineDOT and MPO self-certifications of their statewide and metropolitan transportation planning processes and federal agency routine involvement in the transportation planning processes, FHWA and FTA hereby make the following determinations:

1. The projects in the FY 2012 – 2015 STIP are based on a transportation planning process that substantially meets the requirements of Title 23, U.S.C. 134 and 135, 49 U.S.C. Section 5303 – 5305 and 23 CFR Part 450 Subparts A, B, and C.

2. We find that each regional TIP is based on a continuing, comprehensive, cooperative transportation planning process carried on cooperatively by the State, the MPO's, and the transit operators in accordance with the provisions of 23 U.S.C. 134 and 135, and 49 U.S.C. Section 5303 – 5305.

A SAFETEA-LU compliance review was completed as part of the development of the TIPs and STIP. Approval of the UPWPs earlier this summer was also done in compliance with SAFETEA-LU. On June 7, 2011, FHWA approved MaineDOT's request for the re-adoption of "Connecting Maine", the current Statewide Long-Range Transportation Plan 2008-2020 (dated July 2010), extending the planning horizon to 2035. Consequently, it is determined that MaineDOT and the MPOs are in substantial conformance with the SAFETEA-LU. The STIP was published on the MaineDOT website and went through a 30-day public comment period.

In support of our determination, enclosed is a joint FHWA/FTA planning finding on the transportation planning process in accordance with both TIP (23 CFR 450.330(a)) and the STIP (23 CFR 450.220(b)). The Statewide and MPO planning finding is based on a continuing, comprehensive, cooperative transportation planning process and the self-certification statements submitted by the Department and MPO's under 23 CFR 450.334. It is also based upon documentation of routine FHWA/FTA involvement in the statewide and metropolitan planning processes, public involvement, and fiscal constraint.

Accordingly, the FHWA and FTA have jointly determined the Maine FY 2012-2015 STIP satisfies the requirements for the obligation of FHWA Federal-aid highway funds and FTA Federal transit grants for the period October 1, 2011 to September 30, 2013 and is hereby approved, effective October 1, 2011.

Approval of the STIP does not constitute project or grant approval. Both agencies may need additional information on some of the projects in the approved STIP when a project agreement or grant submission approval is requested. Should you have any questions regarding this subject, please feel free to contact Carlos Pena (207) 622-8350 Ext. 117, or William Gordon at (617) 494-3514.

Sincerely,

Mary Beth Mello

STATEWIDE & METROPOLITAN PLANNING FINDING
SEPTEMBER 30, 2011

In accordance with 23 CFR 450.330, the FHWA and the FTA, based on the self-certifications of the statewide and metropolitan transportation planning process for and within the State of Maine, and routine FHWA and FTA participation in this transportation planning process hereby find that the projects in the FY 2012 - FY 2015 STIP/TIP's are based on a continuing, comprehensive, cooperative transportation planning process that substantially meets the requirements of 23 CFR Part 450 Subpart A, B, and C, 49 U.S.C. Sections 5303-5305, Section 8 of the Federal Transit Act (49 U.S.C. app. 1607) and 23 U.S.C. Sections 134 and 135.

The FHWA Division Office and the FTA Regional Office have routinely been involved in working with Maine's four MPO's, transit operators and Maine DOT in the statewide and metropolitan planning processes (e.g., review, concurrence, or approval of various planning documents), and the State's progress in addressing past planning findings.

ROUTINE INVOLVEMENT INCLUDES

- Review and approval of the MPO Unified Planning Work Programs
- Review and approval of the MaineDOT BTSP Biennial Work Program
- Review and approval of the MaineDOT M&O Traffic Work Plan
- Track progress of work plan/programs via Quarterly Reports
- Review of Biennial Capital Work Plan
- Review and approval of the Research Work Plan
- Review and approval of numerous STIP, TIP, and UPWP amendments
- Review and approval of numerous functional classification changes
- Review and approval for use of the ITS Regional Architecture
- Technical assistance on the development of the MPO PL Funding Formula revisions
- Technical assistance for and review and approval of the MPO Boundary Maps
- Technical assistance for and review of Title VI Plans and Accomplishments Reports
- Technical assistance with distribution of new Planning Emphasis Areas
- Technical assistance on the Air Quality Conformity Analysis Committee
- Motor Fuels, CMAQ, HPMS & HVUT Process Review involvement
- Technical assistance with several updated Long Range Plans
- Technical assistance to local elected officials, training, web conference etc
- Technical assistance with Traffic Monitoring Conference, data sharing
- Technical assistance on fiscal constraint items for TIP's and STIP
- Technical assistance on the I-295 Corridor Study and project prioritization
- Technical assistance with ADA issues, meetings, guidance and training
- Technical assistance on Highway Statistics, videoconference etc.
- Technical assistance in other items noted below in the Planning Observations

PLANNING OBSERVATIONS

The following strengths of the Maine DOT and MPO's transportation planning processes have been identified:

- Multiple planning studies that are taking place in the State including the Gorham East-West study, Statewide Rail Plan, the York County Corridor Study, and Franklin arterial
- Regional Needs Assessments
- MPO UPWP Reports and Accomplishments
- MaineDOT BTSP and Traffic Monitoring Work Plan Quarterly Report Accomplishments
- EPA award to the Gateway 1 Corridor Project
- Maine's Local Roads Program Activities
- Development of the UPWP's and MaineDOT's BTSP Work Plan

- Northeast CanAm Connections Study
- Functional Classification Reviews, outreach and planning efforts for Maine communities
- Development of the 6-Year Plan, Work Program, TIP's, STIP & LRP's
- MPO Planning, Policy and Technical Meeting, utilized to carry out the planning program
- FTA/FHWA/MaineDOT Quarterly Planning Meetings
- Air Quality Conformity Analysis and interagency consultation meetings
- TIP prioritization process improvements
- MaineDOT interagency meetings

SUGGESTED IMPROVEMENTS

The following suggestions are offered for improving the MaineDOT and MPO transportation planning processes:

- Formalize and finalize the STIP administrative Procedures
- Fully implement the BTSP Advanced Scoping Process
- Continue to improve communication and partnerships with the MPO's
- Strengthen MaineDOT / MPO / FHWA Title VI Planning efforts
- Strengthen public outreach to Maine's Indian Tribes
- MaineDOT and all MPOs continue to update their Title VI Plans and prepare Accomplishments Report
- Integrate MPOs emergency evacuation plans with state plan
- Finalize the "Public Involvement Plan"
- Revise "Maine's Freight Strategy"
- Continue to Strengthen Linking Planning & NEPA
- Clarify the selection and ranking process for CMAQ Projects

Re: 2012 – 2015 Statewide Transportation Improvement Program
and Connecting Maine: Planning our Transportation Future
Air Quality Conformity Analysis

Dear Mr. Jorgensen:

EPA New England's Air Quality Unit has conducted a review of the Draft July 2011 "Air Quality Conformity Analysis for the 2012 – 2015 Statewide Transportation Improvement Program and Connecting Maine: Planning Our Transportation Future," prepared by the Maine Department of Transportation in accordance with EPA's Transportation Conformity Rule as amended.

EPA New England believes that the air quality conformity analysis supports U.S. DOT making positive transportation improvement program conformity determinations for: (1) the Portland Maine 8-hour ozone attainment area with a maintenance plan (which includes portions of Androscoggin, Cumberland, Sagadahoc, and York Counties); and (2) the Midcoast Maine 8-hour ozone attainment area with a maintenance plan (which includes portions of Hancock, Knox, Lincoln, and Waldo Counties). Specifically, the air quality conformity analysis demonstrates that:

- The Kittery Area Comprehensive Transportation Study (KACTS) Metropolitan Planning Organization (MPO), the Portland Area Comprehensive Transportation Committee (PACTS) Metropolitan Planning Organization, and the Maine Department of Transportation (for the geographic area outside the Metropolitan Planning Organization boundaries) jointly demonstrate transportation conformity in the Portland Maine 8-hour ozone attainment area with a maintenance plan. The emissions predicted in the "Build" scenario for future years are less than or equal to the 2007 and 2016 motor vehicle emissions budgets.

  The 2007 volatile organic compounds (VOC) and nitrogen oxides (NOx) motor vehicle emissions budgets were contained in the Portland Maine marginal 8-hour ozone nonattainment area 5 Percent Increment of Progress SIP. They are 20.115 tons per summer weekday of VOC and 39.893 tons per weekday of NOx, and were approved by EPA on March 25, 2006 (71 FR 14815 – 14816).

  The 2016 VOC and NOx motor vehicle emissions budgets were contained in the Portland Maine 8-hour ozone maintenance plan. They are 16.659 tons per summer

weekday of VOC and 32.837 tons per weekday of NOx, and were approved by EPA on December 11, 2006 (71 FR 71489 - 71491).

Portland, Maine 8-hour Ozone Attainment Area with a Maintenance Plan (Emissions in tons per summer day)				
Year	VOC Build Emissions	VOC Motor Vehicle Emission Budget	NOx Build Emissions	NOx Motor Vehicle Emission Budget
2012	11.044	20.115	19.298	39.893
2016	8.704	16.659	12.447	32.837
2025	5.946	16.659	6.429	32.837
2030	5.849	16.659	5.365	32.837
2035	5.945	16.659	5.151	32.837

- The Maine Department of Transportation demonstrates transportation conformity in the Hancock, Knox, Lincoln, and Waldo Counties, Maine 8-hour ozone attainment area with a maintenance plan, also referred to as the Midcoast area (The Midcoast area does not include any area within a Metropolitan Planning Organization). The air quality conformity analysis satisfactorily demonstrates the emissions predicted in the "Build" scenario for future years are less than or equal to the 2002 baseline emissions (6.816 tons per summer day of VOC, and 11.317 tons per summer day of NOx) and are less than or equal to the 2016 motor vehicle emissions budgets.

  The 2016 VOC and NOx motor vehicle emissions budgets were contained in the Hancock, Knox, Lincoln, and Waldo Counties, Maine 8-hour ozone maintenance plan. They are 3.763 tons per summer weekday of VOC and 6.245 tons per weekday of NOx, and were approved by EPA on December 11, 2006 (71 FR 71489 - 71491).

Hancock, Knox, Lincoln, and Waldo Counties, Maine 8-hour Ozone Attainment Area with a Maintenance Plan (Emissions in tons per summer day)				
Year	VOC Build Emissions	VOC 2002 Baseline or VOC Motor Vehicle Emission Budget	NOx Build Emissions	NOx 2002 Baseline or NOx Motor Vehicle Emission Budget
2009	2.442	6.816	3.767	11.317
2016	1.966	3.763	2.547	6.245
2025	1.405	3.763	1.481	6.245
2030	1.377	3.763	1.288	6.245
2035	1.374	3.763	1.286	6.245

- Maine's Statewide Transportation Improvement Program will neither slow down nor interfere with the maintenance plan for the Presque Isle PM_{10} attainment area.

- Maine's Transportation Improvement Program is derived from a conforming Transportation Plan and includes all regionally significant transportation projects contained in the Long Range Transportation Plan for the 2012 through 2015 time frame.

- The Statewide Transportation Improvement program utilizes the latest planning assumptions; the appropriate MOBILE6 emission factor model to develop emission factors; and the relevant Federal, State and Metropolitan Planning Organization Agencies have conducted the consultation process in accordance with the conformity rule.

If you or your staff has any questions regarding our comments, please feel free to contact Ariel Garcia of my staff at (617) 918-1660.

Sincerely,

Anne Arnold

RE: FFY 2012-2015 Draft Statewide Transportation Improvement Program

Dear Mr. Jorgenson:

As required by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) for participation in federal aid programs, attached you will find Maine's proposed *FFY 2012-2015 Statewide Transportation Improvement Program* (STIP) for review and comment. In addition, copies of the STIP have been provided to the U. S. Environmental Protection Agency (EPA). This STIP meets all requirements of 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304, and is consistent with the Maine Department of Transportation's (MaineDOT's) *Long-Range Statewide Transportation Plan.*

All transportation projects included in the four Metropolitan Planning Organization Transportation Improvement Plans (TIPs) are being also reviewed by each MPO, and incorporated as part of MaineDOT's STIP document.

The Clean Air Conformity Analysis, in accordance with Section 176(c) of the Clean Air Act, as amended, in 1990, has been forwarded to all parties under separate cover for review. MaineDOT finds the analysis consistent with the conformity criteria published in 40 CFR Part 51 and Part 93 issued on November 24, 1993, as amended, on November 14, 1995 and September 15, 1997. The analysis demonstrates conformity with the *State Implementation Plan* in all of Maine's maintenance areas, according to the methods prescribed by current federal guidance.

A Notice of Availability for review and comment will be posted on MaineDOT's website beginning on August 19, 2011 and ending on September 19, 2011. The draft STIP document has been sent to the above-mentioned federal agencies, the four MPOs and is available on the MaineDOT's internet website for public review and comment. Public transit stakeholders were afforded opportunities to comment on all public transit projects during the process of developing MaineDOT's *Biennial Operations Plan* (BOP).

The Department understands that FHWA, FTA and the EPA will be coordinating a joint approval of Maine's proposed FFY 2012-2015 STIP document. Please do not hesitate to contact Martin Rooney at 207-624-3317 with any questions or comments.

Sincerely,

Herb Thomson

Re: 2012 – 2015 Statewide Transportation Improvement Program
and Connecting Maine: Planning our Transportation Future
Air Quality Conformity Analysis

Dear Mr. Jorgensen:

EPA New England's Air Quality Unit has conducted a review of the Draft July 2011 "Air Quality Conformity Analysis for the 2012 – 2015 Statewide Transportation Improvement Program and Connecting Maine: Planning Our Transportation Future," prepared by the Maine Department of Transportation in accordance with EPA's Transportation Conformity Rule as amended.

EPA New England believes that the air quality conformity analysis supports U.S. DOT making positive transportation improvement program conformity determinations for: (1) the Portland Maine 8-hour ozone attainment area with a maintenance plan (which includes portions of Androscoggin, Cumberland, Sagadahoc, and York Counties); and (2) the Midcoast Maine 8-hour ozone attainment area with a maintenance plan (which includes portions of Hancock, Knox, Lincoln, and Waldo Counties). Specifically, the air quality conformity analysis demonstrates that:

- The Kittery Area Comprehensive Transportation Study (KACTS) Metropolitan Planning Organization (MPO), the Portland Area Comprehensive Transportation Committee (PACTS) Metropolitan Planning Organization, and the Maine Department of Transportation (for the geographic area outside the Metropolitan Planning Organization boundaries) jointly demonstrate transportation conformity in the Portland Maine 8-hour ozone attainment area with a maintenance plan. The emissions predicted in the "Build" scenario for future years are less than or equal to the 2007 and 2016 motor vehicle emissions budgets.

  The 2007 volatile organic compounds (VOC) and nitrogen oxides (NOx) motor vehicle emissions budgets were contained in the Portland Maine marginal 8-hour ozone nonattainment area 5 Percent Increment of Progress SIP. They are 20.115 tons per summer weekday of VOC and 39.893 tons per weekday of NOx, and were approved by EPA on March 25, 2006 (71 FR 14815 – 14816).

  The 2016 VOC and NOx motor vehicle emissions budgets were contained in the Portland Maine 8-hour ozone maintenance plan. They are 16.659 tons per summer

weekday of VOC and 32.837 tons per weekday of NOx, and were approved by EPA on December 11, 2006 (71 FR 71489 - 71491).

Portland, Maine 8-hour Ozone Attainment Area with a Maintenance Plan (Emissions in tons per summer day)				
Year	VOC Build Emissions	VOC Motor Vehicle Emission Budget	NOx Build Emissions	NOx Motor Vehicle Emission Budget
2012	11.044	20.115	19.298	39.893
2016	8.704	16.659	12.447	32.837
2025	5.946	16.659	6.429	32.837
2030	5.849	16.659	5.365	32.837
2035	5.945	16.659	5.151	32.837

- The Maine Department of Transportation demonstrates transportation conformity in the Hancock, Knox, Lincoln, and Waldo Counties, Maine 8-hour ozone attainment area with a maintenance plan, also referred to as the Midcoast area (The Midcoast area does not include any area within a Metropolitan Planning Organization). The air quality conformity analysis satisfactorily demonstrates the emissions predicted in the "Build" scenario for future years are less than or equal to the 2002 baseline emissions (6.816 tons per summer day of VOC, and 11.317 tons per summer day of NOx) and are less than or equal to the 2016 motor vehicle emissions budgets.

  The 2016 VOC and NOx motor vehicle emissions budgets were contained in the Hancock, Knox, Lincoln, and Waldo Counties, Maine 8-hour ozone maintenance plan. They are 3.763 tons per summer weekday of VOC and 6.245 tons per weekday of NOx, and were approved by EPA on December 11, 2006 (71 FR 71489 - 71491).

Hancock, Knox, Lincoln, and Waldo Counties, Maine 8-hour Ozone Attainment Area with a Maintenance Plan (Emissions in tons per summer day)				
Year	VOC Build Emissions	VOC 2002 Baseline or VOC Motor Vehicle Emission Budget	NOx Build Emissions	NOx 2002 Baseline or NOx Motor Vehicle Emission Budget
2009	2.442	6.816	3.767	11.317
2016	1.966	3.763	2.547	6.245
2025	1.405	3.763	1.481	6.245
2030	1.377	3.763	1.288	6.245
2035	1.374	3.763	1.286	6.245

- Maine's Statewide Transportation Improvement Program will neither slow down nor interfere with the maintenance plan for the Presque Isle PM_{10} attainment area.

- Maine's Transportation Improvement Program is derived from a conforming Transportation Plan and includes all regionally significant transportation projects contained in the Long Range Transportation Plan for the 2012 through 2015 time frame.

- The Statewide Transportation Improvement program utilizes the latest planning assumptions; the appropriate MOBILE6 emission factor model to develop emission factors; and the relevant Federal, State and Metropolitan Planning Organization Agencies have conducted the consultation process in accordance with the conformity rule.

If you or your staff has any questions regarding our comments, please feel free to contact Ariel Garcia of my staff at (617) 918-1660.

Sincerely,

Anne Arnold

Dear Mr. Howard:

The Maine Department of Environmental Protection has completed its review of the input files and the project analyses for the draft 2012-2015 STIP/TIP conformity analysis. Our review has verified the correct use of control measures for this determination.

If you have any questions, do not hesitate to contact me at 287-6102.

Sincerely,

Melissa Morrill

Room 614, Edmund Muskie Federal Building
Augusta, ME 04330

Attn: Carlos Pena, Division Transportation Planner

Subject: KACTS' approval of the Conformity Analysis for the *2012-2015 Statewide Transportation Improvement Program* (STIP) and Connecting Maine, Maine's 2035 Long-Range Transportation Plan

Dear Mr. Jorgensen:

In accordance with Section 176 (c) of the Clean Air Act as amended in 1990, the KACTS MPO has completed its review and has determined that the 8-Hour Conformity Analysis for 2012-2015 STIP and Connecting Maine, developed by the Maine Department of Transportation is consistent with the conformity criteria published in 40 CFR parts 51 and 93.

Because southern Maine's ozone maintenance area (Portland Area) is composed of two MPOs (KACTS & PACTS) and a donut area outside of the two MPO boundaries, the total motor vehicle emissions (VOC and NOx) from all three of these areas must be combined in order to pass the conformity criteria. We have found that the VOC and NOx emissions attributable to this ozone nonattainment area pass all required conformity tests.

KACTS further certifies that all of the MPO's transportation projects included in its Long-Range Transportation Plan and Transportation Improvement Program (TIP) have been incorporated verbatim and that the MPO TIP comes from a conforming plan. If you have any questions or need further clarification please contact Nate Howard at MaineDOT at 624-3310.

Sincerely,

Tom Reinauer
Director, KACTS MPO

Subject: PACTS' approval of the Conformity Analysis for the *2012-2015 Statewide Transportation Improvement Program* (STIP) and Connecting Maine, Maine's 2035 Long-Range Transportation Plan

Dear Mr. Jorgensen:

In accordance with Section 176 (c) of the Clean Air Act as amended in 1990, the PACTS MPO has completed its review and has determined that the 8-Hour Conformity Analysis for 2012-2015 STIP and Connecting Maine, developed by the Maine Department of Transportation, is consistent with the conformity criteria published in 40 CFR parts 51 and 93.

Because southern Maine's ozone maintenance area (Portland Area) is composed of two MPOs (KACTS & PACTS) and a donut area outside of the two MPO boundaries, the total motor vehicle emissions (VOC and NOx) from all three of these areas must be combined in order to pass the conformity criteria. We have found that the VOC and NOx emissions attributable to this ozone nonattainment area pass all required conformity tests.

PACTS further certifies that all of the MPO's transportation projects included in its Long-Range Transportation Plan and Transportation Improvement Program (TIP) have been incorporated verbatim and that the MPO TIP comes from a conforming plan. If you have any questions or need further clarification, please contact Nate Howard at MaineDOT at 624-3310.

Sincerely,

John Duncan
Director, PACTS MPO
