

Paper Flower Necklace Instructions

Materials:

Cut paper flowers

String

Paper Straws

1. Take your string. This will be the base of your necklace. If you have tape, you can tape down one end of the string so that the flowers and straw pieces don't fall off when you put them on your string. Otherwise, just be careful when stringing.

2. Take the straws and color on them (or leave them white if you want). Cut them into smaller pieces (4-6 per straw). These will be the beads that go between your flowers. Sometimes the flowers will slip over the straw beads. No worries! Just push the flowers back over the bead.

3. Alternate stringing flowers and straw pieces on your base string until you have a few inches left on your string.

4. Take off the tape on the end of your string (don't let the flowers fall off!) and tie the two ends of the string together in a knot (or have an adult tie it). Your flower necklace is finished!
