Note: MRS may request additional information supporting the credit claimed before the return can be processed.

2021
Pine Tree Development Zone Tax Credit (“PTDZ”)
Worksheet Instructions

Statewide PTDZ classification:

Tier 1: All areas of the state outside Cumberland and York counties plus high unemployment areas within Cumberland and York counties. To qualify as a Tier 1 location, a municipality in Cumberland or York County must have an unemployment rate that is 15% higher than the county’s labor market unemployment rate for the calendar year. The benefit period is ten years. Check the Tier 1 box on the worksheet if the qualified business activity has been certified by the Department of Economic and Community Development (“DECD”) as occurring in a Tier 1 location. Also check the Tier 1 box if the qualified business activity was certified by DECD prior to 2010 and after 2013.

General Instructions

What is the PTDZ income tax credit? The credit is available to certain businesses that expand or begin operations in Maine. For Tier 1 qualified businesses, the credit allowed is up to 100% of the Maine tax liability related to qualified activity for the first five tax years and 50% of the tax liability for each of the tax years six through ten. For details about the program, visit: www.maine.gov/revenue/taxes/tax-relief-credits-programs/multiple-tax-programs/pine-tree-development-zone.

Who must complete this worksheet? Corporate taxpayers (including insurance companies) claiming PTDZ tax credits must calculate the credits using this worksheet. Individual, estate and trust taxpayers claiming a PTDZ credit from either a sole proprietorship or a pass-through entity (such as a partnership or S corporation) must calculate the amount of the credit using this worksheet and Worksheet PTE. These required worksheets must be attached to the taxpayer’s Maine income tax return along with a copy of the PTDZ certificate issued by DECD.

What does this worksheet do? This worksheet calculates the PTDZ apportionment percentage for those entities that have qualified and non-qualified business activity. The worksheet also calculates the application of the PTDZ tax credit for all qualified businesses. Individuals claiming this credit must also complete Worksheet PTE, which apportions the taxpayer’s income between business and nonbusiness sources. Non-qualified business activity includes the level of business activity in Maine that existed prior to PTDZ certification.

For more information about the PTDZ program and the related benefits, see Maine Revenue Services guidance on the PTDZ tax credit available at: www.maine.gov/revenue/taxes/tax-relief-credits-programs/multiple-tax-programs/pine-tree-development-zone.

In the case of pass-through entities (such as partnerships, LLCs, S corporations and trusts), the partners, members, shareholders, beneficiaries or other owners are allowed credits in proportion to their respective interests in these entities.

Specific Instructions

Note: Individual taxpayers must skip lines 1 through 6 and enter on line 7 the amount from Worksheet PTE, line 8.

Line 1. Enter the average value of qualified Pine Tree Development Zone property. Qualified property includes all real and tangible personal property directly associated with the qualified business activity and placed in service in Maine after the entity becomes a certified PTDZ business. Excluded from this amount is the value of property transferred by an affiliated business to a PTDZ business from elsewhere in Maine. Purchased property is valued at cost and rented property is valued at eight times the annual rental rate. Total qualified property is determined by averaging the property owned or rented at the beginning and the end of the tax year.

Line 2. Enter the average value of all property located in Maine and owned or rented by the entity or by affiliated businesses.

Line 3. Enter the compensation paid to new employees engaged in a qualified business activity. Compensation of employees transferred by the business or an affiliated business to a PTDZ business from elsewhere in Maine must be excluded from this line. “New employee” means employees above the baseline, as established for the Department of Economic and Community Development.

Line 4. Enter the compensation of all Maine employees of the business, including Maine employees of affiliated businesses.

Line 7. Corporate taxpayers (including insurance companies) enter the result of line 5 divided by line 6. This is the ratio of qualified to non-qualified business activity for the corporation. Individual, estate and trust taxpayers enter the amount from Worksheet PTE, line 8. This is the ratio of qualified business activity to the taxpayer’s overall activity, including nonbusiness income. For example, if an individual is claiming a PTDZ credit of 100%, but only 50% of the taxpayer’s income is from qualified business activity, the taxpayer is only entitled to a credit against the tax liability related to the qualified business activity, or 50% of the total tax liability for the year.
